Astragalus robbinsii var. fernaldii

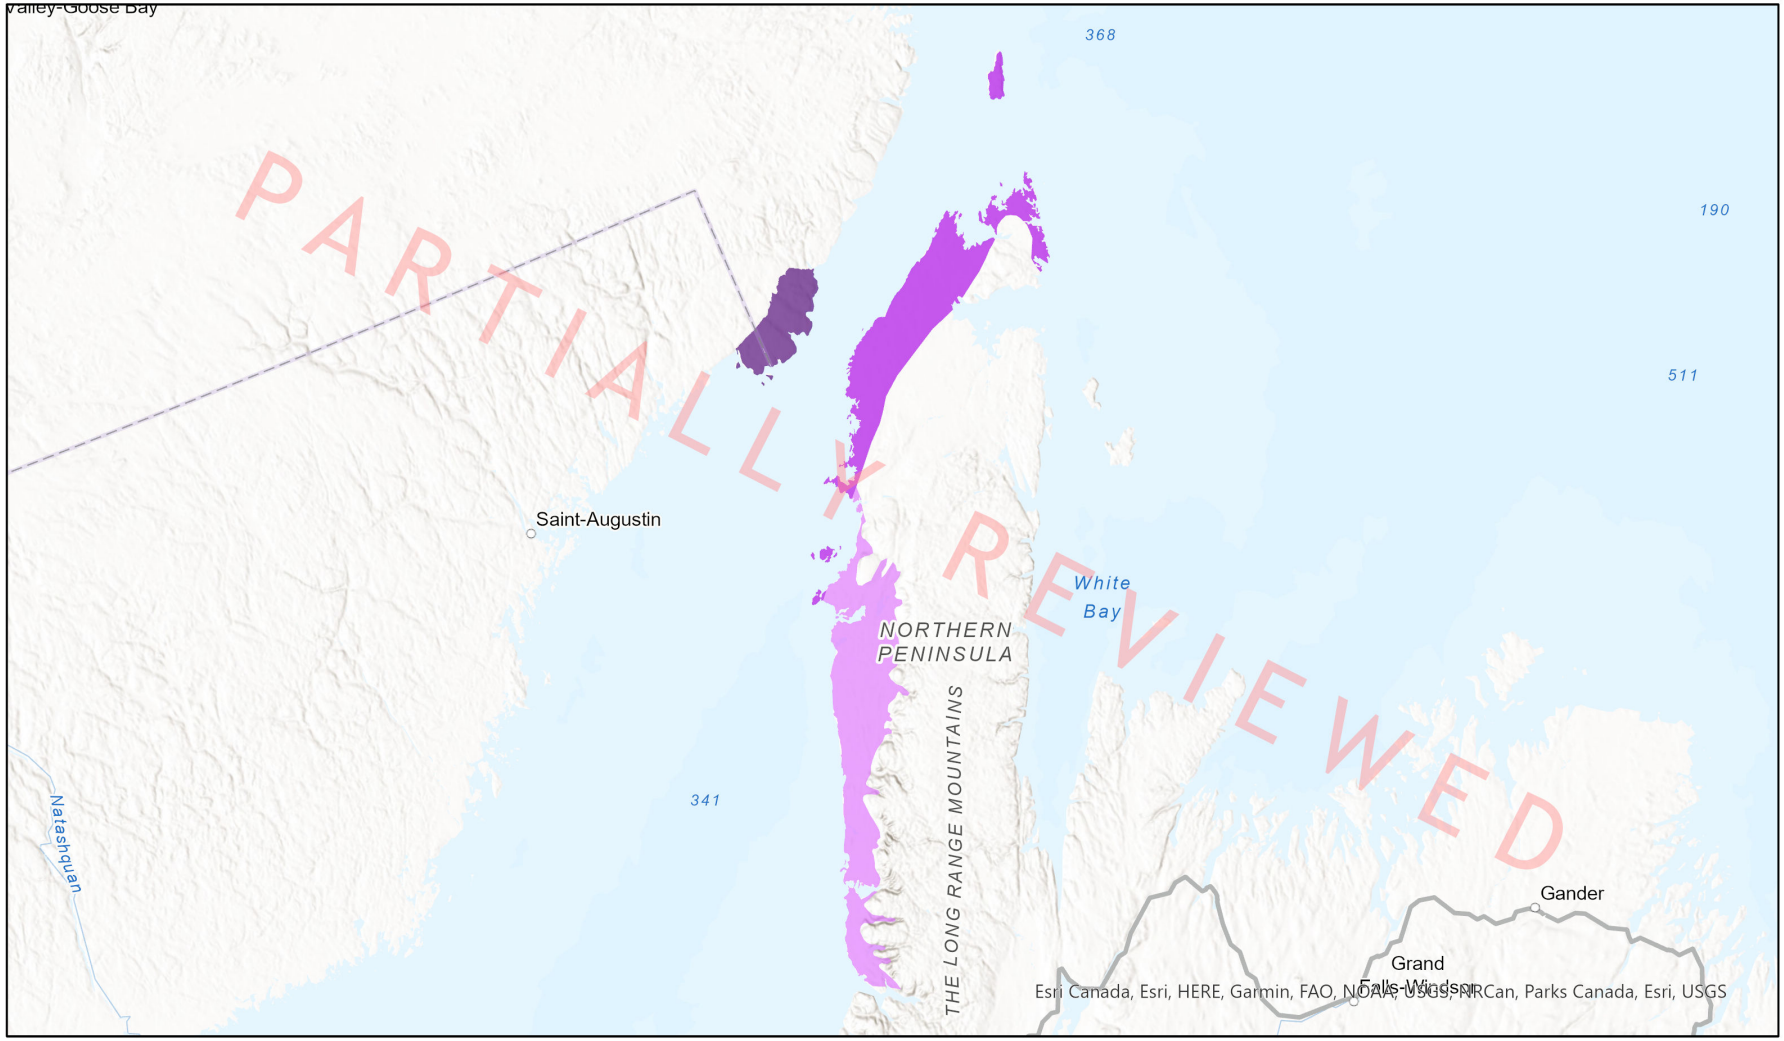
- Present
- Presence Expected
- Historical

NatureServe Canada

Ecosystem-based Automated Range (EBAR)

Date Generated: November 7, 2022; Version: 1.0; Stage: Expert Reviewed (Partially Reviewed); Scope: Canadian

Synonyms Used: Astragalus robbinsii fernaldii



0 50 100 km

Input Records - 372 ACCDC Observations, 9 BISON, 3 GBIF, 6 QC Element Occurrences; Expert Reviews - Frédéric Coursol, 1 Anonymous

Map centre: 56.8408°W 50.8342°N

EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

Ecosystem-based Automated Range (EBAR) Metadata

Species

National Scientific Name:	*Astragalus robbinsii var. fernaldii* (Rydb.) Barneby
Scientific Name Reference:	Kartesz, J.T. 1994. A synonymized checklist of the vascular flora of the United States, Canada, and Greenland. 2nd edition. 2 vols. Timber Press, Portland, OR.
National English Name:	Fernald's Milkvetch
National French Name:	Astragale de Fernald
Element National ID:	216147
Element Global ID:	131115 (go to NatureServe Explorer)
Element Code:	PDFAB0F7P2
Endemism Type:	Y
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	4

Rank/Status

Global Rank:	G5T1T2 (reviewed September 16, 2015)
National Rank (Canada):	N1N2 (reviewed 2015)
Subnational Ranks (Canada):	LB=SNR, NF=SNR, QC=S1
National Rank (United States):	None
Subnational Ranks (United States):	None
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	Special Concern/Préoccupante (June 05, 2003)
Canadian COSEWIC Status:	Special Concern (November 01, 2001)
US ESA Status:	None

Range Map

Date Generated:	November 07, 2022
Version:	1.0
Stage:	Expert Reviewed (Partially Reviewed)
Scope:	Canadian
Metadata:	Primary Species - *Astragalus robbinsii var. fernaldii* (Rydb.) Barneby; Synonyms - *Astragalus robbinsii fernaldii* Input Records - 372 ACCDC Observations, 9 BISON, 3 GBIF, 6 QC Element Occurrences; Expert Reviews - Frédéric Coursol, 1 Anonymous
Comments:	This range has been partially reviewed. The following jurisdictions have been reviewed: Quebec.
Disclaimer:	Please review our methods document before using EBAR. EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis. The absence of data in any geographic areas does not necessarily mean that a species is not present. An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	(Please see Comments above for any exceptions) Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion. Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model. Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).
Usage Type Definitions:	(Please see Comments above for any exceptions) Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion. Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
