

Plethodon vehiculum

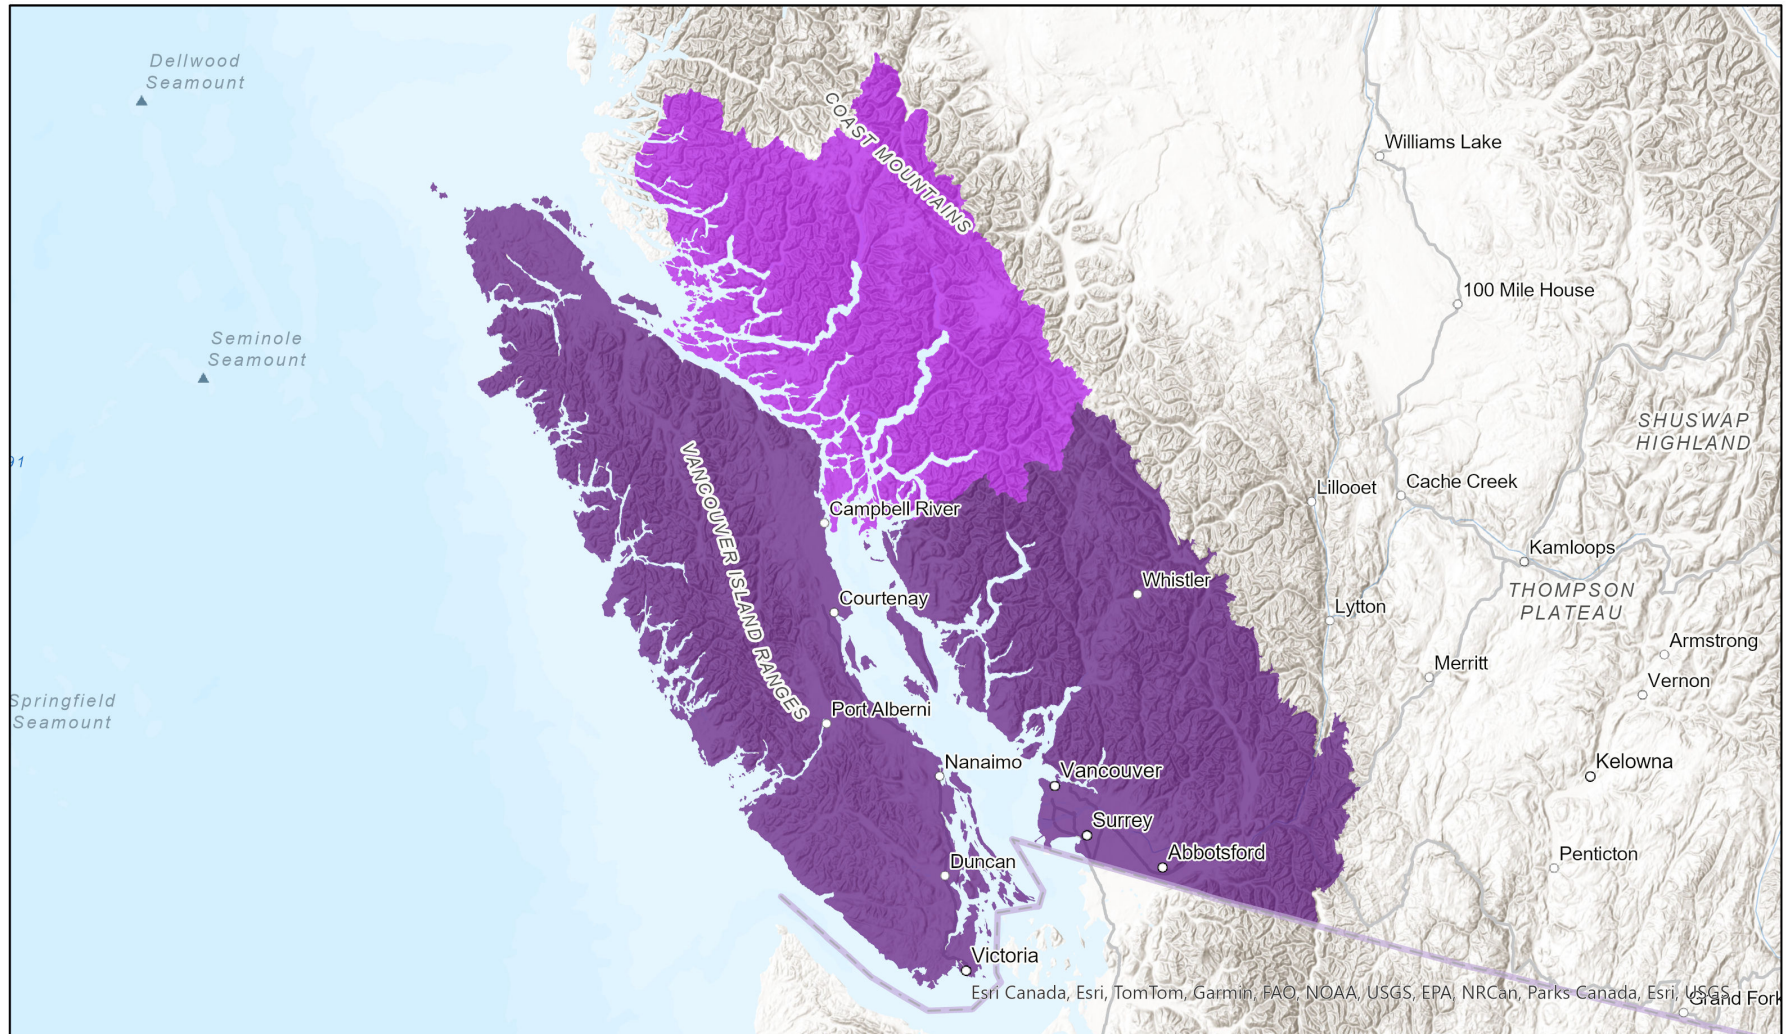

- Present
- Presence Expected
- Historical

Ecosystem-based Automated Range (EBAR)

Date Generated: February 27, 2024; Version: 1.0; Stage: Expert Reviewed (National); Scope: Canadian

Synonyms Used: None

Input Records - 240 BC Survey Observations, 1290 GBIF, 966 iNaturalist.ca, 139 iNaturalist.ca (original coordinates for obscured records), 983 iNaturalist.org; Expert Reviews - BC Experts

Map centre: 124.7685° W 50.1174° N

EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

Ecosystem-based Automated Range (EBAR) Metadata

Species

National Scientific Name:	<i>Plethodon vehiculum</i> (Cooper, 1860)
Scientific Name Reference:	Frost, D.R. 2020. Amphibian Species of the World: an Online Reference. Version 6.0. American Museum of Natural History, New York, USA. Online: http://research.amnh.org/herpetology/amphibia/index.html
National English Name:	Western Red-backed Salamander
National French Name:	Salamandre à dos rayé
Element National ID:	167333
Element Global ID:	100174 (go to NatureServe Explorer)
Element Code:	AAAAD12200
Endemism Type:	N
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	694

Rank/Status

Global Rank:	G5 (reviewed February 02, 2016)
National Rank (Canada):	N4 (reviewed 2022)
Subnational Ranks (Canada):	BC=S4
National Rank (United States):	N5 (reviewed 1996)
Subnational Ranks (United States):	OR=S5, WA=S5
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	None
Canadian COSEWIC Status:	Not at Risk (November 01, 2001)
US ESA Status:	None

Range Map

Date Generated:	February 27, 2024
Version:	1.0
Stage:	Expert Reviewed (National)
Scope:	Canadian
Metadata:	Primary Species - <i>Plethodon vehiculum</i> (Cooper, 1860) Input Records - 240 BC Survey Observations, 1290 GBIF, 966 iNaturalist.ca, 139 iNaturalist.ca (original coordinates for obscured records), 983 iNaturalist.org; Expert Reviews - BC Experts
Comments:	None Please see spatial data for Ecoshape-level reviewer comments.
Disclaimer:	Please review our methods document before using EBAR. EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis. The absence of data in any geographic areas does not necessarily mean that a species is not present. An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	(Please see Comments above for any exceptions) Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion. Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model. Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).
Usage Type Definitions:	(Please see Comments above for any exceptions) Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion. Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
