Ecosystem-based Automated Range (EBAR)

Date Generated: November 9, 2025; Version: 1.0; Stage: Auto-generated; Scope: Canadian

Synonyms Used: None

0 500 1,000 km
Map centre: 89.589°O 50.1656°N
© NatureServe Canada 2026 under CC BY 4.0

Input Records - 20 ACCDC Observations (1960-2020), 391 Birds Canada Nature Counts (1862-2024), 9906 eBird (1862-2022), 42 ECCC Critical Habitat (2024), 8 GBIF (2019-2023), 775 iNaturalist.ca (1979-2025), 40 iNaturalist.ca (original coordinates for obscured records) (2015-2025), 25 ON Breeding Bird Atlas (2001), 18 ON Element Occurrences (1929-2016), 9337 ON Observations and Source Features (1928-2024); Expert Reviews -

EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

Ecosystem-based Automated Range (EBAR) Metadata

Species

National Scientific Name:	<i>Protonotaria citrea</i> (Boddaert, 1783)
Scientific Name Reference:	American Ornithologists' Union (AOU). 1998. Check-list of North American birds. Seventh edition. American Ornithologists' Union, Washington, D.C. [as modified by subsequent supplements and corrections published in <i>The Auk</i>]. Also available online: http://www.aou.org/ .
National English Name:	Prothonotary Warbler
National French Name:	Paruline orangée
Element National ID:	163599
Element Global ID:	100372 (go to NatureServe Explorer)
Element Code:	ABPBX07010
Endemism Type:	N
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	31
English COSEWIC Common Name:	Prothonotary Warbler
French COSEWIC Common Name:	Paruline orangée

Rank/Status

Global Rank:	G5 (reviewed April 09, 2016)
National Rank (Canada):	N1B (reviewed 2023)
Subnational Ranks (Canada):	ON=S1B
National Rank (United States):	N5B (reviewed 1997)
Subnational Ranks (United States):	AL=S5B, AR=S4B, AZ=S1M, CO=SNA, CT=SNA, DC=S1B, DE=S4B, FL=S4B, GA=S3S4, IA=S3B,S3N, IL=S5, IN=S4B, KS=S3B, KY=S5B, LA=S5B, MA=S1B,S2N, MD=S4B, MI=S3, MN=SNRB, MO=S4, MS=S5B, NC=S5B, NE=S2, NJ=S4B,S4N, NM=S4N, NY=S2B, OH=S3, OK=SNRB, PA=S3B,S2M, RI=S1B,S1N, SC=S3S4, SD=SNA, TN=S4, TX=S3B, VA=S4, WI=S4B, WV=S2B
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	Endangered/En voie de disparition (June 05, 2003)
Canadian COSEWIC Status:	Endangered
US ESA Status:	None

Range Map

Date Generated:	November 09, 2025
Version:	1.0
Stage:	Auto-generated
Scope:	Canadian
Metadata:	Primary Species - <i>Protonotaria citrea</i> (Boddaert, 1783) Input Records - 20 ACCDC Observations (1960-2020), 391 Birds Canada Nature Counts (1862-2024), 9906 eBird (1862-2022), 42 ECCC Critical Habitat (2024), 8 GBIF (2019-2023), 775 iNaturalist.ca (1979-2025), 40 iNaturalist.ca (original coordinates for obscured records) (2015-2025), 25 ON Breeding Bird Atlas (2001), 18 ON Element Occurrences (1929-2016), 9337 ON Observations and Source Features (1928-2024); Expert Reviews -
Comments:	None
Disclaimer:	Please review our methods document before using EBAR. EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis. The absence of data in any geographic areas does not necessarily mean that a species is not present. An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	(Please see Comments above for any exceptions) Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion. Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model. Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?), or expert opinion that the species is extirpated or historical.
Usage Type Definitions:	(Please see Comments above for any exceptions) Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion. Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
