EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

Ecosystem-based Automated Range (EBAR) Metadata

Species

National Scientific Name:	<i>Martes americana atrata</i> (Bangs, 1897)
Scientific Name Reference:	Dawson, N. G., and J. A. Cook. 2012. Behind the genes: diversification of North American martens (<i>Martes americana</i> and <i>M. caurina</i>). Pages 23-38 in K. B. Aubry, W. J. Zielinski, M. G. Raphael, and S. W. Buskirk, editors. Biology and conservation of martens, sables, and fishers: a new synthesis. Cornell University Press, Ithaca, New York.
National English Name:	American Marten - Newfoundland population
National French Name:	Martre d'Amérique - population de Terre-Neuve
Element National ID:	166899
Element Global ID:	102305 (go to NatureServe Explorer)
Element Code:	AMAJF01011
Endemism Type:	Y
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	134
English COSEWIC Common Name:	American Marten (Newfoundland population)
French COSEWIC Common Name:	Martre d'Amérique (Population de Terre-Neuve)

Rank/Status

Global Rank:	G5T3 (reviewed February 26, 2025)
National Rank (Canada):	N3 (reviewed 2022)
Subnational Ranks (Canada):	NF=S3S4
National Rank (United States):	None
Subnational Ranks (United States):	None
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	Threatened/Menacée (June 05, 2003)
Canadian COSEWIC Status:	Special Concern
US ESA Status:	None

Range Map

Date Generated:	October 08, 2025
Version:	1.0
Stage:	Expert Reviewed (Partially Reviewed)
Scope:	Global
Metadata:	Primary Species - <i>Martes americana atrata</i> (Bangs, 1897) Input Records - 46 ECCC Critical Habitat (2024), 13 iDigBio (1700-1916), 9 iNaturalist.ca (original coordinates for obscured records) (2017-2025), 2 NCC Endemics Records (2008-2014); Expert Reviews - John Klymko, 1 Anonymous
Comments:	This range has been partially reviewed.
Disclaimer:	Please review our methods document before using EBAR. EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis. The absence of data in any geographic areas does not necessarily mean that a species is not present. An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	(Please see Comments above for any exceptions) Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion. Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model. Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?), or expert opinion that the species is extirpated or historical.
Usage Type Definitions:	(Please see Comments above for any exceptions) Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion. Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
