EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

Ecosystem-based Automated Range (EBAR) Metadata

Species

National Scientific Name:	<i>Aegolius acadicus brooksi</i> (J.H. Fleming, 1916)
Scientific Name Reference:	Committee on the Status of Endangered Wildlife in Canada (COSEWIC). 2017. COSEWIC Assessment Results, November 2017. Online. Available: http://www.cosewic.ca/index.php/en-ca/assessment-process .
National English Name:	Northern Saw-whet Owl brooksi subspecies
National French Name:	Petite nyctale brooksi
Element National ID:	165142
Element Global ID:	103233 (go to NatureServe Explorer)
Element Code:	ABNSB15022
Endemism Type:	Y
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	883

Rank/Status

Global Rank:	G5T2T3 (reviewed October 02, 2018)
National Rank (Canada):	N2N3 (reviewed 2020)
Subnational Ranks (Canada):	BC=S2S3
National Rank (United States):	None
Subnational Ranks (United States):	None
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	Threatened/Menacée (December 13, 2007)
Canadian COSEWIC Status:	Threatened (November 01, 2017)
US ESA Status:	None

Range Map

Version:	1.0
Stage:	Expert Reviewed
Scope:	Global
Metadata:	Primary Species - <i>Aegolius acadicus brooksi</i> (J.H. Fleming, 1916) Input Records - 22 BC Non-sensitive Element Occurrences, 57 BC Survey Observations, 19 BISON, 3 eBird, 13 ECCC Critical Habitat, 43 iDigBio, 17 iNaturalist.ca, 3 VertNet; Expert Reviews - 1 Anonymous
Comments:	None Please see spatial data for Ecoshape-level reviewer comments.
Disclaimer:	Please review our methods document before using EBAR. EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis. The absence of data in any geographic areas does not necessarily mean that a species is not present. An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	(Please see Comments above for any exceptions) Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion. Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model. Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).
Usage Type Definitions:	(Please see Comments above for any exceptions) Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion. Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
