

Ambystoma gracile

Ecosystem-based Automated Range (EBAR)

Date Generated: November 25, 2024; Version: 1.0; Stage: Expert Reviewed (National); Scope: Canadian

Synonyms Used: None

0 270 540 km

Input Records - 8246 BC Survey Observations, 714 iNaturalist.ca, 89 iNaturalist.ca (original coordinates for obscured records), 9 iNaturalist.org; Expert Reviews - BC Experts

Map centre: 128.8683°W 54.5589°N

EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

Ecosystem-based Automated Range (EBAR) Metadata

Species

National Scientific Name:	<i>Ambystoma gracile</i> (Baird, 1857 [1859])
Scientific Name Reference:	Frost, D.R. 2020. Amphibian Species of the World: an Online Reference. Version 6.0. American Museum of Natural History, New York, USA. Online: http://research.amnh.org/herpetology/amphibia/index.html
National English Name:	Northwestern Salamander
National French Name:	Salamandre foncée
Element National ID:	165001
Element Global ID:	103251 (go to NatureServe Explorer)
Element Code:	AAAAA01040
Endemism Type:	N
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	560

Rank/Status

Global Rank:	G5 (reviewed May 10, 2016)
National Rank (Canada):	N4 (reviewed 2022)
Subnational Ranks (Canada):	BC=S4
National Rank (United States):	N5 (reviewed 1996)
Subnational Ranks (United States):	AK=S3, CA=SNR, OR=S5, WA=S5
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	None
Canadian COSEWIC Status:	Not at Risk (April 01, 1999)
US ESA Status:	None

Range Map

Date Generated:	November 25, 2024
Version:	1.0
Stage:	Expert Reviewed (National)
Scope:	Canadian
Metadata:	Primary Species - <i>Ambystoma gracile</i> (Baird, 1857 [1859]) Input Records - 8246 BC Survey Observations, 714 iNaturalist.ca, 89 iNaturalist.ca (original coordinates for obscured records), 9 iNaturalist.org; Expert Reviews - BC Experts
Comments:	None Please see spatial data for Ecoshape-level reviewer comments.
Disclaimer:	Please review our methods document before using EBAR. EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis. The absence of data in any geographic areas does not necessarily mean that a species is not present. An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	(Please see Comments above for any exceptions) Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion. Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model. Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?), or expert opinion that the species is extirpated or historical.
Usage Type Definitions:	(Please see Comments above for any exceptions) Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion. Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
