EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

Ecosystem-based Automated Range (EBAR) Metadata

Species

National Scientific Name:	<i>Coluber constrictor flaviventris</i> Say, 1823
Scientific Name Reference:	Crother, B. I. (editor). 2017. Scientific and standard English names of amphibians and reptiles of North America north of Mexico, with comments regarding confidence in our understanding. 8th edition. SSAR Herpetological Circular 43:1-104. [Updates in SSAR North American Species Names Database at: https://ssarherps.org/cndb]
National English Name:	Eastern Yellow-bellied Racer
National French Name:	Couleuvre agile à ventre jaune de l'Est
Element National ID:	167312
Element Global ID:	104215 (go to NatureServe Explorer)
Element Code:	ARADB07014
Endemism Type:	N
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	280

Rank/Status

Global Rank:	G5T5 (reviewed February 02, 2016)
National Rank (Canada):	N2N3 (reviewed 2021)
Subnational Ranks (Canada):	AB=S1, SK=S2S3
National Rank (United States):	N5 (reviewed 1996)
Subnational Ranks (United States):	AR=S4, AZ=S1, CO=S5, MO=S5, OH=SNR, WY=S4
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	Threatened/Menacée (August 15, 2006)
Canadian COSEWIC Status:	Threatened (November 26, 2015)
US ESA Status:	None

Range Map

Date Generated:	August 30, 2023
Version:	1.0
Stage:	Expert Reviewed (Low Star Rating- National)
Scope:	Canadian
Metadata:	Primary Species - <i>Coluber constrictor flaviventris</i> Say, 1823 Input Records - 6 BISON, 29 FWMIS, 2 iDigBio, 11 iNaturalist.ca, 11 iNaturalist.ca (original coordinates for obscured records), 37 iNaturalist.org, 44 SK Element Occurrences, 1 SK Observation Points, 18 SK Source Feature Points, 68 SK Source Feature Polygons, 2 VertNet; Expert Reviews - Laura Gardiner, Chris Somers
Comments:	This range has a low star rating. The true range of this species is much patchier and the ecoshapes overexaggerate the species range in Canada.
Disclaimer:	Please review our methods document before using EBAR. EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis. The absence of data in any geographic areas does not necessarily mean that a species is not present. An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	(Please see Comments above for any exceptions) Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion. Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model. Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).
Usage Type Definitions:	(Please see Comments above for any exceptions) Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion. Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
