EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

## Ecosystem-based Automated Range (EBAR) Metadata

---

### Species

National Scientific Name:	<i>Ascaphus truei</i> Stejneger, 1899
Scientific Name Reference:	Nielson, M., K. Lohman, and J. Sullivan. 2001. Phylogeography of the tailed frog ( <i>Ascaphus truei</i> ): implications for the biogeography of the Pacific Northwest. <i>Evolution</i> 55:147-160.
National English Name:	Coastal Tailed Frog
National French Name:	Grenouille-a-queue côtière
Element National ID:	164110
Element Global ID:	104837 ( <a href="#">go to NatureServe Explorer</a> )
Element Code:	AAABA01010
Endemism Type:	N

### Rank/Status

Global Rank:	G4 (reviewed February 02, 2016)
National Rank (Canada):	N4 (reviewed 2020)
Subnational Ranks (Canada):	BC=S4
National Rank (United States):	N4 (reviewed 2001)
Subnational Ranks (United States):	CA=S3S4, OR=S3, WA=S4
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	Special Concern/Préoccupante (June 05, 2003)
Canadian COSEWIC Status:	Special Concern (November 25, 2011)
US ESA Status:	None

## Range Map

<b>Date Generated:</b>	January 26, 2022
<b>Version:</b>	1.0
<b>Stage:</b>	Expert Reviewed (National)
<b>Scope:</b>	Canadian
<b>Metadata:</b>	Primary Species Name - <i>Ascaphus truei</i> Stejneger, 1899 Input Records - 380 BC Incidental Observations, 55 BC Non-sensitive Element Occurrences, 3103 BC Survey Observations, 69 BISON, 121 GBIF, 77 iNaturalist.ca, 74 VertNet; Expert Reviews - 1 Anonymous
<b>Comments:</b>	<a href="#">Please see spatial data for reviewer comments.</a>
<b>Disclaimer:</b>	Please review our <a href="#">methods document</a> before using EBAR.  EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis.  The absence of data in any geographic areas does not necessarily mean that a species is not present.  An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
<b>Presence Definitions:</b>	Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion.  Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model.  Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).
<b>Map Projection:</b>	North America Albers Equal Area Conic (WKID 4269)
