EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

## Ecosystem-based Automated Range (EBAR) Metadata

---

### Species

National Scientific Name:	<i>Catharus bicknelli</i> (Ridgway, 1882)
Scientific Name Reference:	American Ornithologists' Union (AOU). 1998. Check-list of North American birds. Seventh edition. American Ornithologists' Union, Washington, D.C. [as modified by subsequent supplements and corrections published in <i>The Auk</i> ]. Also available online: <a href="http://www.aou.org/">http://www.aou.org/</a> .
National English Name:	Bicknell's Thrush
National French Name:	Grive de Bicknell
Element National ID:	163988
Element Global ID:	106330 ( <a href="#">go to NatureServe Explorer</a> )
Element Code:	ABPBJ18120
Endemism Type:	N
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	584

## Rank/Status

<b>Global Rank:</b>	G4 (reviewed April 07, 2016)
<b>National Rank (Canada):</b>	N2B (reviewed 2023)
<b>Subnational Ranks (Canada):</b>	NB=S2B, NS=S1B, ON=SNA, PE=SHB, QC=S2B
<b>National Rank (United States):</b>	N4B (reviewed 1997)
<b>Subnational Ranks (United States):</b>	CT=SNA, DE=SNA, GA=SNA, MA=SXB, MD=SNA, ME=S2B, NC=SNA, NH=S2S3B, NJ=S3N, NY=S2S3B, PA=SNA, RI=SNA, SC=SNA, VA=SNA, VT=S2B
<b>National Rank (Mexico):</b>	None
<b>Subnational Ranks (Mexico):</b>	None
<b>Canadian SARA Status:</b>	Threatened/Menacée (June 20, 2012)
<b>Canadian COSEWIC Status:</b>	Threatened (December 01, 2022)
<b>US ESA Status:</b>	None

## Range Map

<b>Date Generated:</b>	April 16, 2024
<b>Version:</b>	1.0
<b>Stage:</b>	Expert Reviewed (National)
<b>Scope:</b>	Canadian
<b>Metadata:</b>	Primary Species - <i>Catharus bicknelli</i> (Ridgway, 1882) Input Records - 1746 ACCDC Observations, 2734 eBird, 26 iNaturalist.ca, 4 iNaturalist.ca (original coordinates for obscured records), 82 Maritimes Breeding Bird Atlas, 128 QC Breeding Bird Atlas, 150 QC Element Occurrences; Expert Reviews - Sean Blaney, 1 Anonymous
<b>Comments:</b>	None <a href="#">Please see spatial data for Ecoshape-level reviewer comments.</a>
<b>Disclaimer:</b>	Please review our <a href="#">methods document</a> before using EBAR.  EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis.  The absence of data in any geographic areas does not necessarily mean that a species is not present.  An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
<b>Presence Definitions:</b>	(Please see Comments above for any exceptions)  Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion.  Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model.  Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).
<b>Usage Type Definitions:</b>	(Please see Comments above for any exceptions)  Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion.  Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
<b>Map Projection:</b>	North America Albers Equal Area Conic (WKID 4269)
