Ecosystem-based Automated Range (EBAR)

Date Generated: April 20, 2023; Version: 1.0; Stage: Expert Reviewed (National); Scope: Canadian

Synonyms Used: None

0 40 80 km

Input Records - 2 BC Non-sensitive Element Occurrences, 1 ECC Critical Habitat, 1 iNaturalist.ca; Expert Reviews - BC Experts

Map centre: 123.4788° W 49.4519° N

EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

Ecosystem-based Automated Range (EBAR) Metadata

Species

National Scientific Name:	<i>Poocetes gramineus affinis</i> G. S. Miller, 1888
Scientific Name Reference:	American Ornithologists' Union (AOU). 1957. The AOU check-list of North American birds, 5th ed. Port City Press, Inc., Baltimore, MD. 691 pp.
National English Name:	Coastal Vesper Sparrow
National French Name:	Bruant vespéral de la sous-espèce affinis
Element National ID:	161799
Element Global ID:	106361 (go to NatureServe Explorer)
Element Code:	ABPBX95011
Endemism Type:	N
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	924

Rank/Status

Global Rank:	G5T2 (reviewed August 03, 2022)
National Rank (Canada):	N1B (reviewed 2019)
Subnational Ranks (Canada):	BC=S1B
National Rank (United States):	NNR
Subnational Ranks (United States):	CA=S2, OR=S1B, WA=S1B
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	Endangered/En voie de disparition (December 13, 2007)
Canadian COSEWIC Status:	Endangered (April 01, 2018)
US ESA Status:	None

Range Map

Date Generated:	April 20, 2023
Version:	1.0
Stage:	Expert Reviewed (National)
Scope:	Canadian
Metadata:	Primary Species - <i>Pooecetes gramineus affinis</i> G. S. Miller, 1888 Input Records - 2 BC Non-sensitive Element Occurrences, 1 ECCC Critical Habitat, 1 iNaturalist.ca; Expert Reviews - BC Experts
Comments:	None Please see spatial data for Ecoshape-level reviewer comments.
Disclaimer:	Please review our methods document before using EBAR. EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis. The absence of data in any geographic areas does not necessarily mean that a species is not present. An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	(Please see Comments above for any exceptions) Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion. Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model. Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).
Usage Type Definitions:	(Please see Comments above for any exceptions) Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion. Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
