

# *Thamnophis ordinoides*

## Ecosystem-based Automated Range (EBAR)

Date Generated: February 27, 2024; Version: 1.0; Stage: Expert Reviewed (National); Scope: Canadian

Synonyms Used: None

- Present
- Presence Expected
- Historical

0 60 120 km

Input Records - 2760 BC Survey Observations, 2256 GBIF, 2307 iNaturalist.ca, 157 iNaturalist.ca (original coordinates for obscured records), 2040 iNaturalist.org; Expert Reviews - BC Experts

Map centre: 124.4189° W 49.8987° N

EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

## Ecosystem-based Automated Range (EBAR) Metadata

---

### Species

National Scientific Name:	<i>Thamnophis ordinoides</i> (Baird and Girard, 1852)
Scientific Name Reference:	Crother, B. I. (editor). 2017. Scientific and standard English names of amphibians and reptiles of North America north of Mexico, with comments regarding confidence in our understanding. 8th edition. SSAR Herpetological Circular 43:1-104. [Updates in SSAR North American Species Names Database at: <a href="https://ssarherps.org/cndb">https://ssarherps.org/cndb</a> ]
National English Name:	Northwestern Gartersnake
National French Name:	Couleuvre du Nord-Ouest
Element National ID:	168102
Element Global ID:	106394 ( <a href="#">go to NatureServe Explorer</a> )
Element Code:	ARADB36080
Endemism Type:	N
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	777

## Rank/Status

<b>Global Rank:</b>	G5 (reviewed February 02, 2016)
<b>National Rank (Canada):</b>	N4 (reviewed 2024)
<b>Subnational Ranks (Canada):</b>	BC=S4
<b>National Rank (United States):</b>	N5 (reviewed 1996)
<b>Subnational Ranks (United States):</b>	CA=SNR, OR=S5, WA=S5
<b>National Rank (Mexico):</b>	None
<b>Subnational Ranks (Mexico):</b>	None
<b>Canadian SARA Status:</b>	None
<b>Canadian COSEWIC Status:</b>	Not at Risk (May 01, 2003)
<b>US ESA Status:</b>	None

## Range Map

<b>Date Generated:</b>	February 27, 2024
<b>Version:</b>	1.0
<b>Stage:</b>	Expert Reviewed (National)
<b>Scope:</b>	Canadian
<b>Metadata:</b>	Primary Species - <i>Thamnophis ordinoides</i> (Baird and Girard, 1852) Input Records - 2760 BC Survey Observations, 2256 GBIF, 2307 iNaturalist.ca, 157 iNaturalist.ca (original coordinates for obscured records), 2040 iNaturalist.org; Expert Reviews - BC Experts
<b>Comments:</b>	None <a href="#">Please see spatial data for Ecoshape-level reviewer comments.</a>
<b>Disclaimer:</b>	Please review our <a href="#">methods document</a> before using EBAR.  EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis.  The absence of data in any geographic areas does not necessarily mean that a species is not present.  An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
<b>Presence Definitions:</b>	(Please see Comments above for any exceptions)  Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion.  Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model.  Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).
<b>Usage Type Definitions:</b>	(Please see Comments above for any exceptions)  Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion.  Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
<b>Map Projection:</b>	North America Albers Equal Area Conic (WKID 4269)
