- Historical

## Ecosystem-based Automated Range (EBAR)

Date Generated: January 28, 2023; Version: 1.0; Stage: Expert Reviewed; Scope: Global

Synonyms Used: None

0 80 160 km

Input Records - 97 BC Non-sensitive Element Occurrences, 51 BC Survey Observations; Expert Reviews - 1 Anonymous

Map centre: 119.101°W 50.6596°N

EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

## Ecosystem-based Automated Range (EBAR) Metadata

---

### Species

National Scientific Name:	<i>Megascops kennicottii macfarlanei</i> Brewster, 1891
Scientific Name Reference:	Hekstra, G. P. 1982. A revision of the American screech owls (OTUS: Strigidae). Vrije Universiteit te Amsterdam. 131pp.
National English Name:	Interior Western Screech-owl
National French Name:	Petit-duc des montagnes de la sous-espèce macfarlanei
Element National ID:	162725
Element Global ID:	106439 ( <a href="#">go to NatureServe Explorer</a> )
Element Code:	ABNSB01041
Endemism Type:	N
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	720

## Rank/Status

Global Rank:	G4G5T4 (reviewed April 09, 2016)
National Rank (Canada):	N3 (reviewed 2018)
Subnational Ranks (Canada):	BC=S3
National Rank (United States):	None
Subnational Ranks (United States):	None
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	Threatened/Menacée (January 12, 2005)
Canadian COSEWIC Status:	Threatened (May 04, 2012)
US ESA Status:	None

## Range Map

Date Generated:	January 28, 2023
Version:	1.0
Stage:	Expert Reviewed
Scope:	Global
Metadata:	Primary Species - <i>Megascops kennicottii macfarlanei</i> Brewster, 1891 Input Records - 97 BC Non-sensitive Element Occurrences, 51 BC Survey Observations; Expert Reviews - 1 Anonymous
Comments:	None <a href="#">Please see spatial data for Ecoshape-level reviewer comments.</a>
Disclaimer:	Please review our <a href="#">methods document</a> before using EBAR.  EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis.  The absence of data in any geographic areas does not necessarily mean that a species is not present.  An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	(Please see Comments above for any exceptions)  Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion.  Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model.  Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).
Usage Type Definitions:	(Please see Comments above for any exceptions)  Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion.  Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
