EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

Ecosystem-based Automated Range (EBAR) Metadata

Species

National Scientific Name:	<i>Tympanuchus cupido pinnatus</i> (Brewster, 1885)
Scientific Name Reference:	American Ornithologists' Union (AOU). 1957. The AOU check-list of North American birds, 5th ed. Port City Press, Inc., Baltimore, MD. 691 pp.
National English Name:	Greater Prairie-chicken
National French Name:	Tétras des prairies
Element National ID:	163065
Element Global ID:	106546 (go to NatureServe Explorer)
Element Code:	ABNLC13013
Endemism Type:	N
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	35
English COSEWIC Common Name:	Greater Prairie-Chicken
French COSEWIC Common Name:	Tétras des prairies

Rank/Status

Global Rank:	G4T4 (reviewed April 10, 2016)
National Rank (Canada):	NX (reviewed 2022)
Subnational Ranks (Canada):	AB=SX, MB=SX, ON=SX, SK=SX
National Rank (United States):	N4 (reviewed 1997)
Subnational Ranks (United States):	CO=S3, ND=S2
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	Extirpated/Disparue du pays (June 05, 2003)
Canadian COSEWIC Status:	Extirpated
US ESA Status:	None

Range Map

Date Generated:	October 27, 2024
Version:	1.0
Stage:	Auto-generated
Scope:	Canadian
Metadata:	Primary Species - <i>Tympanuchus cupido pinnatus</i> (Brewster, 1885); Secondary Species - <i>Tympanuchus cupido</i> (Linnaeus, 1758) Input Records - 104 Birds Canada Nature Counts, 4 FWMIS, 19 SK Observation Points, 2 SK Source Feature Polygons; Expert Reviews -
Comments:	None
Disclaimer:	Please review our methods document before using EBAR. EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis. The absence of data in any geographic areas does not necessarily mean that a species is not present. An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	(Please see Comments above for any exceptions) Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion. Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model. Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?), or expert opinion that the species is extirpated or historical.
Usage Type Definitions:	(Please see Comments above for any exceptions) Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion. Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
