

# Melanoplus walshii

## Ecosystem-based Automated Range (EBAR)

- Present
- Presence Expected
- Historical

Date Generated: November 1, 2025; Version: 1.0; Stage: Expert Reviewed (Low Star Rating - National); Scope: Canadian

Synonyms Used: None

Sources: Esri, TomTom, Garmin, FAO, NOAA, USGS, © OpenStreetMap contributors, and the GIS User Community, Esri, USGS

0 160 320 km

Input Records - 10 GBIF (1996-2002), 1 iNaturalist.ca (2015), 2 ON Observations and Source Features (2015); Expert Reviews - Robert Buchkowski, Emma Despland

Map centre: 89.3046° W 46.1872° N

EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

## Ecosystem-based Automated Range (EBAR) Metadata

---

### Species

National Scientific Name:	<i>Melanoplus walshii</i> Scudder, 1897
Scientific Name Reference:	Otte, D. 1994-1995. Orthoptera Species File, Volumes 1-5. The Orthopterists' Society and The Academy of Natural Sciences, Philadelphia, Pennsylvania. [As modified by subsequent updates at: <a href="https://orthoptera.speciesfile.org/">https://orthoptera.speciesfile.org/</a> ]
National English Name:	Walsh's Grasshopper
National French Name:	Criquet de Walsh
Element National ID:	169824
Element Global ID:	110785 ( <a href="#">go to NatureServe Explorer</a> )
Element Code:	IIORT01240
Endemism Type:	N
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	
English COSEWIC Common Name:	
French COSEWIC Common Name:	

## Rank/Status

<b>Global Rank:</b>	G4G5 (reviewed December 16, 2012)
<b>National Rank (Canada):</b>	N2 (reviewed 2022)
<b>Subnational Ranks (Canada):</b>	ON=S2
<b>National Rank (United States):</b>	N4N5 (reviewed 2000)
<b>Subnational Ranks (United States):</b>	AL=SNR, GA=SNR, IN=S2, MI=SNR, MO=SNR, NC=SU, PA=SNR, SC=SNR, TN=SNR
<b>National Rank (Mexico):</b>	None
<b>Subnational Ranks (Mexico):</b>	None
<b>Canadian SARA Status:</b>	None
<b>Canadian COSEWIC Status:</b>	None
<b>US ESA Status:</b>	None

## Range Map

<b>Date Generated:</b>	November 01, 2025
<b>Version:</b>	1.0
<b>Stage:</b>	Expert Reviewed (Low Star Rating - National)
<b>Scope:</b>	Canadian
<b>Metadata:</b>	Primary Species - <i>Melanoplus walshii</i> Scudder, 1897 Input Records - 10 GBIF (1996-2002), 1 iNaturalist.ca (2015), 2 ON Observations and Source Features (2015); Expert Reviews - Robert Buchkowski, Emma Despland
<b>Comments:</b>	This range map has a low star rating.
<b>Disclaimer:</b>	Please review our <a href="#">methods document</a> before using EBAR.  EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis.  The absence of data in any geographic areas does not necessarily mean that a species is not present.  An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
<b>Presence Definitions:</b>	(Please see Comments above for any exceptions)  Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion.  Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model.  Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?), or expert opinion that the species is extirpated or historical.
<b>Usage Type Definitions:</b>	(Please see Comments above for any exceptions)  Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion.  Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
<b>Map Projection:</b>	North America Albers Equal Area Conic (WKID 4269)
