Ecosystem-based Automated Range (EBAR) Metadata

National Scientific Name: *Atlanticoncha ochracea* (Say, 1817)

Scientific Name Reference: MolluscaBase eds. 2021. MolluscaBase. http://www.molluscabase.org on 2021-04-06. doi:10.14284/448 (accessed 5 April 2021).

National English Name: Tidewater Mucket

National French Name: Leptodée ocre

Element National ID: 174980

Element Global ID: 114703 (go to NatureServe Explorer)

Element Code: IMBIV24030

Endemism Type: N

Canadian COSEWIC Name:

Canadian COSEWIC ID:

Rank/Status

Global Rank:	G3G4 (reviewed June 21, 2024)
National Rank (Canada):	N3 (reviewed 2022)
Subnational Ranks (Canada):	NB=S3, NS=S1
National Rank (United States):	N3N4 (reviewed 2006)
Subnational Ranks (United States):	CT=S2, DC=SNR, DE=S1, GA=S3, MA=S2?, MD=S1S2, ME=S3, NC=S2, NJ=S2, NY=S1, PA=S1, RI=SNR, SC=S2, VA=S3
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	None
Canadian COSEWIC Status:	None
US ESA Status:	None

Range Map

Date Generated:	March 06, 2025
Version:	1.0
Stage:	Expert Reviewed (National)
Scope:	Canadian
Metadata:	Primary Species - *Atlanticoncha ochracea* (Say, 1817) Input Records - 248 ACCDC Observations, 32 iNaturalist.ca; Expert Reviews - John Klymko
Comments:	None Please see spatial data for Ecoshape-level reviewer comments.
Disclaimer:	Please review our methods document before using EBAR.
	EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis.
	The absence of data in any geographic areas does not necessarily mean that a species is not present.
	An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	(Please see Comments above for any exceptions)
	Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion.
	Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model.
	Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?), or expert opinion that the species is extirpated or historical.
Usage Type Definitions:	(Please see Comments above for any exceptions)
	Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion.
	Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
