

Hemphillia dromedarius

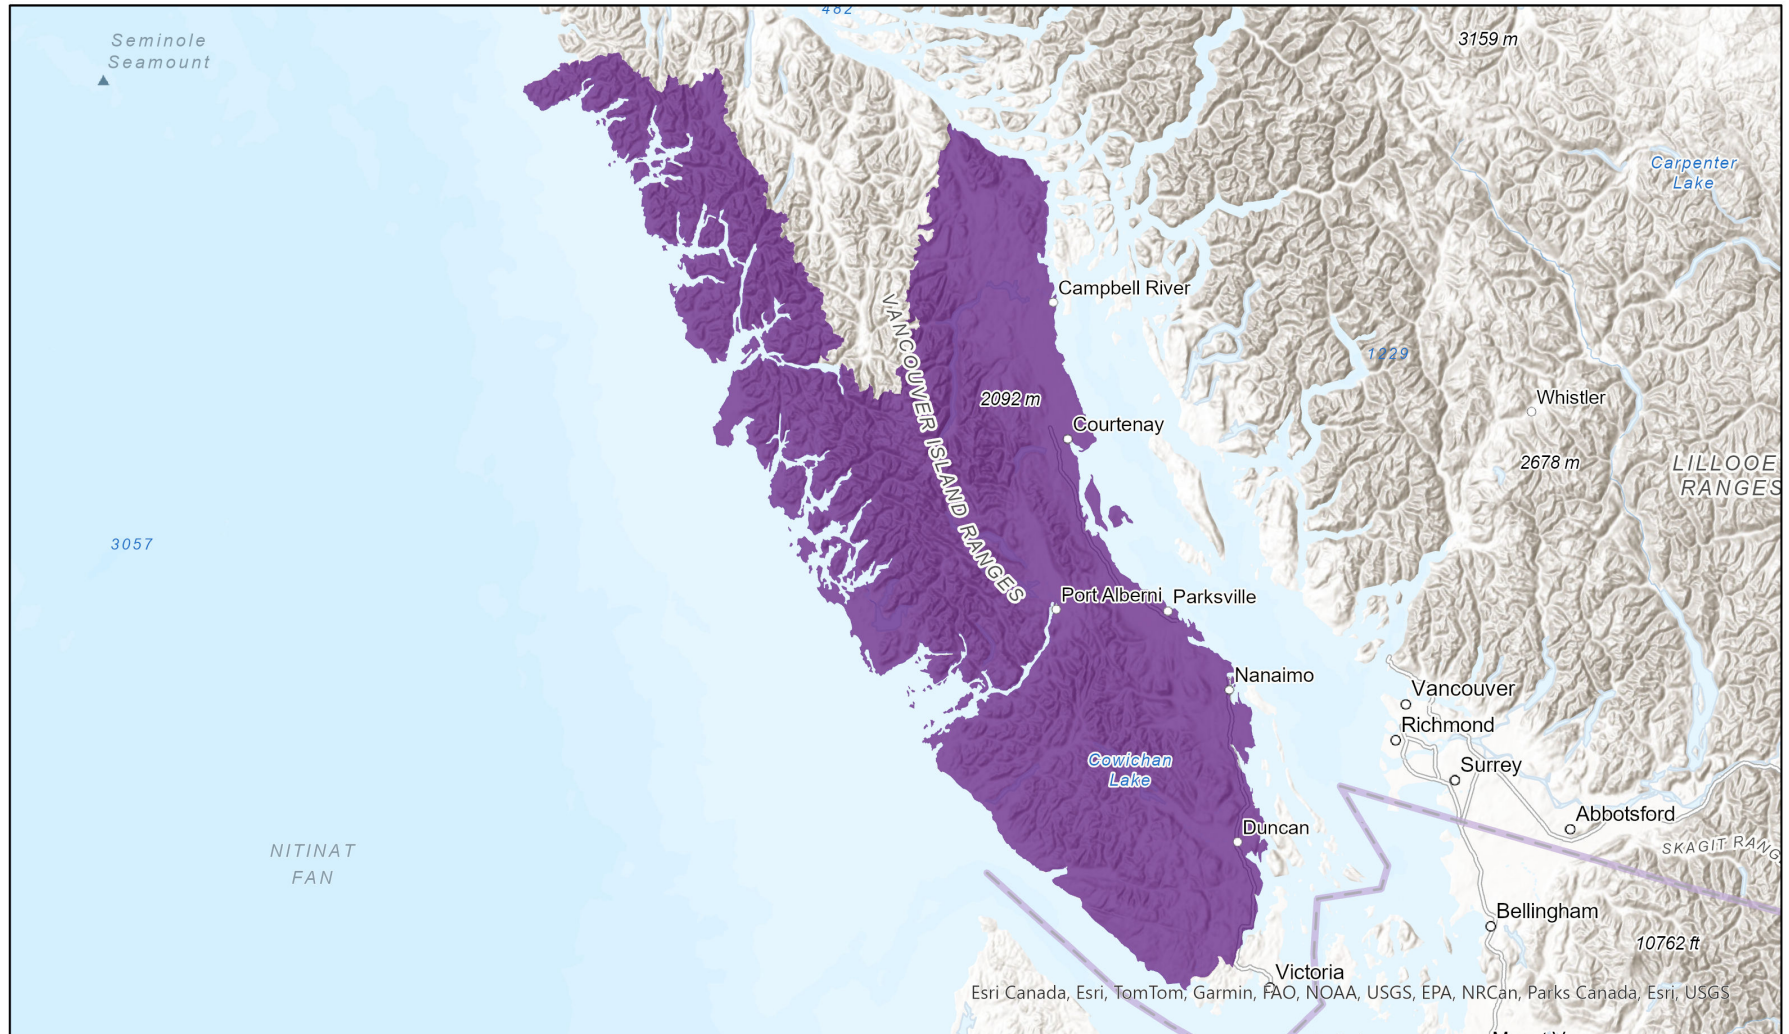

- Present
- Presence Expected
- Historical

Ecosystem-based Automated Range (EBAR)

Date Generated: February 24, 2022; Version: 1.0; Stage: Expert Reviewed (National); Scope: Canadian

Synonyms Used: None

0 40 80 km

Input Records - 2 BC Incidental Observations, 17 BC Non-sensitive Element Occurrences, 6 BISON, 7 GBIF, 2 iNaturalist.ca, 4 iNaturalist.org; Expert Reviews - Annegret Nicolai

Map centre: 125.6368°W 49.3293°N

EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

Ecosystem-based Automated Range (EBAR) Metadata

Species

National Scientific Name:	<i>Hemphillia dromedarius</i> Branson, 1972
Scientific Name Reference:	Lucid, M. K., A. Rankin, A. Espindola, L. Chichester, S. Ehlers, L. Robinson, and J. Sullivan. 2018. Taxonomy and biogeography of <i>Hemphillia</i> (Gastropoda: Pulmonata: Arionidae) in North American rainforests, with description of a new species (Skade's jumping-slug, <i>Hemphillia skadei</i> sp. nov.). Canadian Journal of Zoology 96:305-316.
National English Name:	Dromedary Jumping-slug
National French Name:	Limace-sauteuse dromadaire
Element National ID:	172726
Element Global ID:	115300 (go to NatureServe Explorer)
Element Code:	IMGAS59040
Endemism Type:	N
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	765

Rank/Status

Global Rank:	G3G4 (reviewed August 24, 2005)
National Rank (Canada):	N2 (reviewed 2022)
Subnational Ranks (Canada):	BC=S2
National Rank (United States):	N3N4 (reviewed 2005)
Subnational Ranks (United States):	WA=S3S4
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	Threatened/Menacée (January 12, 2005)
Canadian COSEWIC Status:	Threatened (May 02, 2014)
US ESA Status:	None

Range Map

Date Generated:	February 24, 2022
Version:	1.0
Stage:	Expert Reviewed (National)
Scope:	Canadian
Metadata:	Primary Species Name - <i>Hemphillia dromedarius</i> Branson, 1972 Input Records - 2 BC Incidental Observations, 17 BC Non-sensitive Element Occurrences, 6 BISON, 7 GBIF, 2 iNaturalist.ca, 4 iNaturalist.org; Expert Reviews - Annegret Nicolai
Comments:	None Please see spatial data for Ecoshape-level reviewer comments.
Disclaimer:	Please review our methods document before using EBAR. EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis. The absence of data in any geographic areas does not necessarily mean that a species is not present. An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	(Please see Comments above for any exceptions) Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion. Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model. Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).
Usage Type Definitions:	(Please see Comments above for any exceptions) Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion. Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
