EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

Ecosystem-based Automated Range (EBAR) Metadata

Species

National Scientific Name: Polites sonora (Scudder, 1872)

Scientific Name Reference: Pelham, J.P. 2021. Catalog of the butterflies of the United States and Canada. Revised 28 January 2021.

http://butterfliesofamerica.com/US-Can-Cat.htm

National English Name: Sonoran Skipper

National French Name: Hespérie du Sonora

Element National ID: 183096

Element Global ID: 118829 (go to NatureServe Explorer)

Element Code: IILEP66090

Endemism Type: N

Canadian COSEWIC Name:

Canadian COSEWIC ID: 923

Rank/Status

Global Rank: G4 (reviewed December 16, 2020)

National Rank (Canada): N3 (reviewed 2021)

Subnational Ranks (Canada): BC=S3

National Rank (United States): N4 (reviewed 1998)

Subnational Ranks (United States): AZ=SNR, CA=SNR, CO=S4, ID=S4, MT=S4, NV=SNR, OR=SNR, UT=SNR, WA=S4, WY=SNR

National Rank (Mexico): None
Subnational Ranks (Mexico): None

Canadian SARA Status: Special Concern/Préoccupante (December 13, 2007)

Canadian COSEWIC Status: Not at Risk (November 27, 2016)

US ESA Status: None

Range Map

Date Generated: January 07, 2022

Stage: Expert Reviewed (National)

Scope: Canadian

Metadata: Primary Species Name - Polites sonora (Scudder, 1872)

Input Records - 11 BC Non-sensitive Element Occurrences, 2 BC Survey Observations, 11 BISON, 7 Royal BC Museum;

Expert Reviews - 1 Anonymous

Comments: None

Please see spatial data for Ecoshape-level reviewer comments.

Disclaimer: Please review our <u>methods document</u> before using EBAR.

EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended

for all types of applications and analysis.

The absence of data in any geographic areas does not necessarily mean that a species is not present.

An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic

area.

Presence Definitions: (Please see Comments above for any exceptions)

Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source

Features, Canadian Federal Critical Habitat, or expert opinion.

Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a

habitat suitability model.

Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an

Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).

Usage Type Definitions: (Please see Comments above for any exceptions)

Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert

opinion.

Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction

Breeding and Behaviour Codes, or on expert opinion.

Map Projection: North America Albers Equal Area Conic (WKID 4269)
