EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

Ecosystem-based Automated Range (EBAR) Metadata

Species

National Scientific Name:	<i>Hesperia dacotae</i> (Skinner, 1911)
Scientific Name Reference:	Pohl, G.R. J-F. Landry, B.C. Schmidt, J.D. Lafontaine, J.T. Troubridge, A.D. Macaulay, E. van Nieukerken, J.R. deWaard, J.J. Dombroskie, J. Klymko, V. Nazari and K. Stead. 2018. Annotated checklist of the moths and butterflies (Lepidoptera) of Canada and Alaska. Pensoft Publishers. 580 pp.
National English Name:	Dakota Skipper
National French Name:	Hespérie du Dakota
Element National ID:	181741
Element Global ID:	119247 (go to NatureServe Explorer)
Element Code:	IILEP65140
Endemism Type:	N

Rank/Status

Global Rank:	G2 (reviewed March 22, 2011)
National Rank (Canada):	N2 (reviewed 2020)
Subnational Ranks (Canada):	MB=S2, SK=S1
National Rank (United States):	N2 (reviewed 2003)
Subnational Ranks (United States):	IA=S1, IL=SX, MN=S1, ND=S2, SD=S2
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	Endangered/En voie de disparition (July 14, 2005)
Canadian COSEWIC Status:	Endangered (May 02, 2014)
US ESA Status:	None

Range Map

Date Generated:	February 24, 2022
Version:	1.0
Stage:	Expert Reviewed (National)
Scope:	Canadian
Metadata:	Primary Species Name - <i>Hesperia dacotae</i> (Skinner, 1911) Input Records - 213 BISON, 13 Canadian National Collection of Insects, Arachnids, and Nematodes (Hesperioidea dataset) , 250 GBIF, 7 iDigBio, 6 iNaturalist.ca, 6 iNaturalist.org, 22 MB Element Occurrences, 69 MB Source Feature Points, 62 MB Source Feature Polygons, 3 SK Element Occurrences, 60 SK Source Feature Points, 31 SK Source Feature Polygons; Expert Reviews - Eric Lamb, 1 Anonymous
Comments:	Please see spatial data for reviewer comments.
Disclaimer:	Please review our methods document before using EBAR. EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis. The absence of data in any geographic areas does not necessarily mean that a species is not present. An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion. Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model. Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
