#### Cryptomastix devia

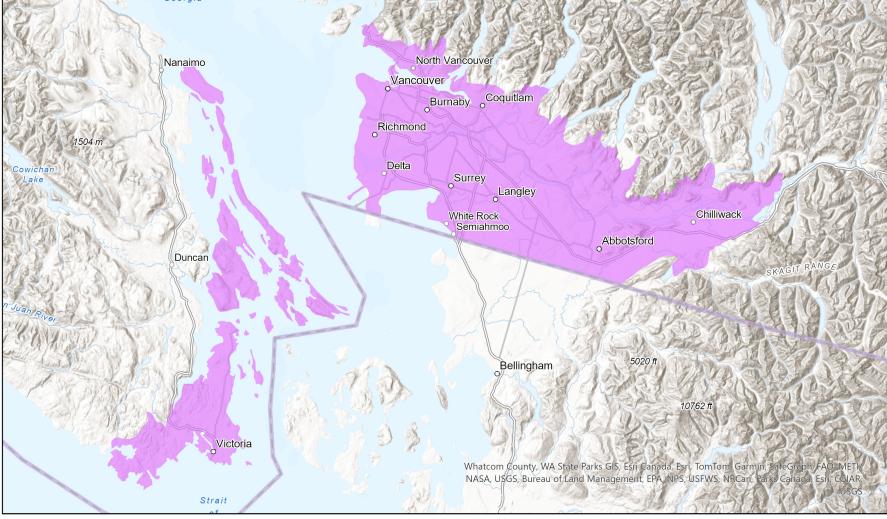

#### Ecosystem-based Automated Range (EBAR)

Date Generated: July 12, 2023; Version: 1.0; Stage: Expert Reviewed (National); Scope: Canadian

Synonyms Used: None

0 10 20 km

Map centre: 122.7727°W 48.9596°N © NatureServe Canada 2020 under CC BY 4.0

EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

Input Records - ; Expert Reviews - BC Experts

## Ecosystem-based Automated Range (EBAR) Metadata

| - |    |          |            |
|---|----|----------|------------|

| ~ | 22 | <u> </u> | <b>~</b> ~ |

| National Scientific Name:  | Cryptomastix devia (Gould, 1846)   |
|----------------------------|--|
| Scientific Name Reference: | Turgeon, D. D., J. F. Quinn, Jr., A. E. Bogan, E. V. Coan, F. G. Hochberg, W. G. Lyons, P. M. Mikkelsen, R. J. Neves, C. F. E. Roper, G. Rosenberg, B. Roth, A. Scheltema, F. G. Thompson, M. Vecchione, and J. D. Williams. 1998. Common and scientific names of aquatic invertebrates from the United States and Canada: Mollusks. 2nd Edition. American Fisheries Society Special Publication 26, Bethesda, Maryland. 526 pp. |
| National English Name:     | Puget Oregonian Snail  |
| National French Name:      | Escargot du Puget  |
| Element National ID:       | 170089   |
| Element Global ID:         | 120732 ( <u>go to NatureServe Explorer</u> )   |
| Element Code:              | IMGAS93010   |
| Endemism Type:             | Ν  |
| Canadian COSEWIC Name:     |  |
| Canadian COSEWIC ID:       | 732  |

## Rank/Status

| G2 (reviewed November 20, 2017)                |
|--|
| NX (reviewed 2024)                             |

#### Range Map

| Date Generated:         | July 12, 2023   |
|-------------------------|---|
| Version:                | 1.0   |
| Stage:                  | Expert Reviewed (National)  |
| Scope:                  | Canadian  |
| Metadata:               | Primary Species - <i>Cryptomastix devia</i> (Gould, 1846)<br>Input Records - ; Expert Reviews - BC Experts  |
| Comments:               | None<br><u>Please see spatial data for Ecoshape-level reviewer comments</u> .   |
| Disclaimer:             | Please review our <u>methods document</u> before using EBAR.  |
|                         | EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis.  |
|                         | The absence of data in any geographic areas does not necessarily mean that a species is not present.  |
|                         | An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.  |
| Presence Definitions:   | (Please see Comments above for any exceptions)  |
|                         | Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source<br>Features, Canadian Federal Critical Habitat, or expert opinion.                                    |
|                         | Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model.   |
|                         | Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?). |
| Usage Type Definitions: | (Please see Comments above for any exceptions)  |
|                         | Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion.   |
|                         | Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.  |
| Map Projection:         | North America Albers Equal Area Conic (WKID 4269)   |
|                         |   |
