

Erioderma mollissimum

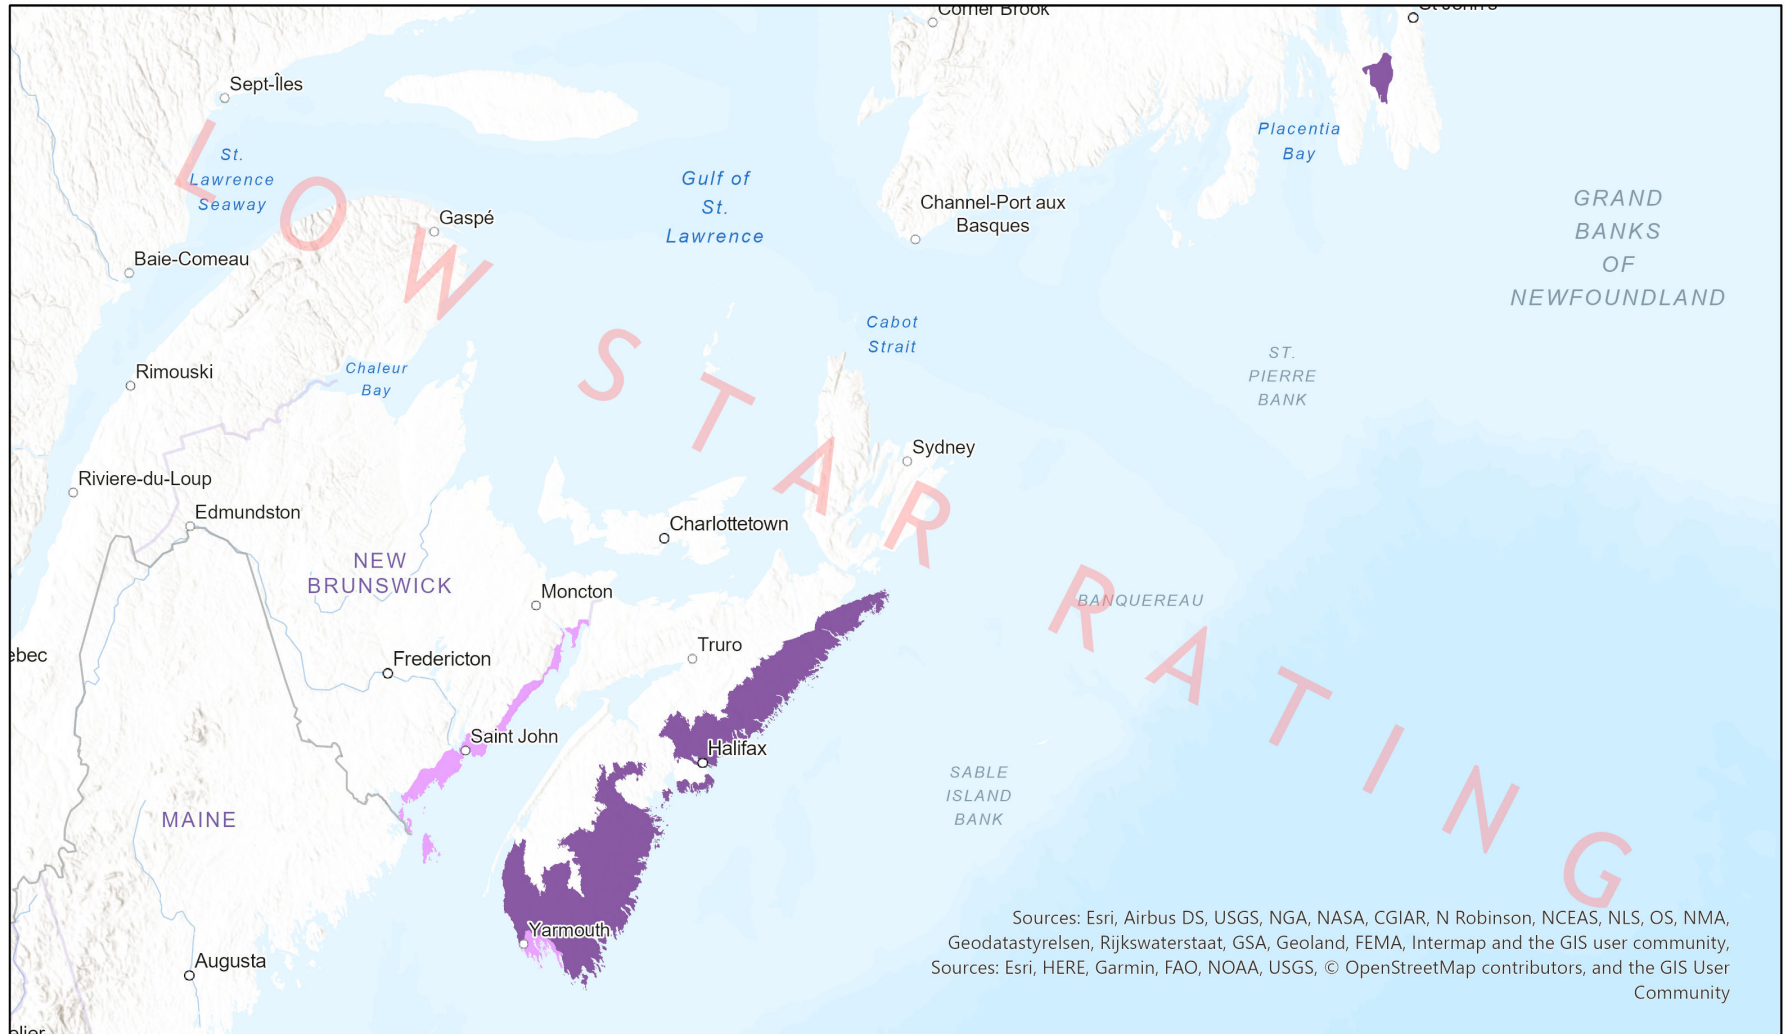

- Present
- Presence Expected
- Historical

Ecosystem-based Automated Range (EBAR)

Date Generated: March 27, 2023; Version: 1.0; Stage: Expert Reviewed (Low Star Rating- National); Scope: Canadian

Synonyms Used: None

0 130 260 km

Input Records - 303 ACCDC Observations, 4 BISON, 28 GBIF, 19 iNaturalist.ca; Expert Reviews - Sean Haughian, 1 Anonymous

Map centre: 60.5744° W 45.77° N

EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

Ecosystem-based Automated Range (EBAR) Metadata

Species

National Scientific Name:	<i>Erioderma mollissimum</i> (G. Sampaio) Du Rietz
Scientific Name Reference:	Esslinger, T. L. 2018. A cumulative checklist for the lichen-forming, lichenicolous and allied fungi of the continental United States and Canada, Version 22. <i>Opuscula Philolichenum</i> 17:6-268. [http://sweetgum.nybg.org/philolichenum/]
National English Name:	Vole Ears Lichen
National French Name:	Érioderme mou
Element National ID:	740873
Element Global ID:	123298 (go to NatureServe Explorer)
Element Code:	NLT0010640
Endemism Type:	N
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	1067

Rank/Status

Global Rank:	G4G5 (reviewed December 05, 2002)
National Rank (Canada):	N1N2 (reviewed 2017)
Subnational Ranks (Canada):	LB=SNR, NB=SH, NF=S1S2, NS=S1
National Rank (United States):	NNR
Subnational Ranks (United States):	None
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	Endangered/En voie de disparition (June 20, 2012)
Canadian COSEWIC Status:	Endangered (May 01, 2021)
US ESA Status:	None

Range Map

Date Generated:	March 27, 2023
Version:	1.0
Stage:	Expert Reviewed (Low Star Rating- National)
Scope:	Canadian
Metadata:	Primary Species - <i>Erioderma mollissimum</i> (G. Sampaio) Du Rietz Input Records - 303 ACCDC Observations, 4 BISON, 28 GBIF, 19 iNaturalist.ca; Expert Reviews - Sean Haughian, 1 Anonymous
Comments:	This range has a low star rating.
Disclaimer:	Please review our methods document before using EBAR. EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis. The absence of data in any geographic areas does not necessarily mean that a species is not present. An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	(Please see Comments above for any exceptions) Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion. Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model. Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).
Usage Type Definitions:	(Please see Comments above for any exceptions) Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion. Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
