

# *Salix raupii*

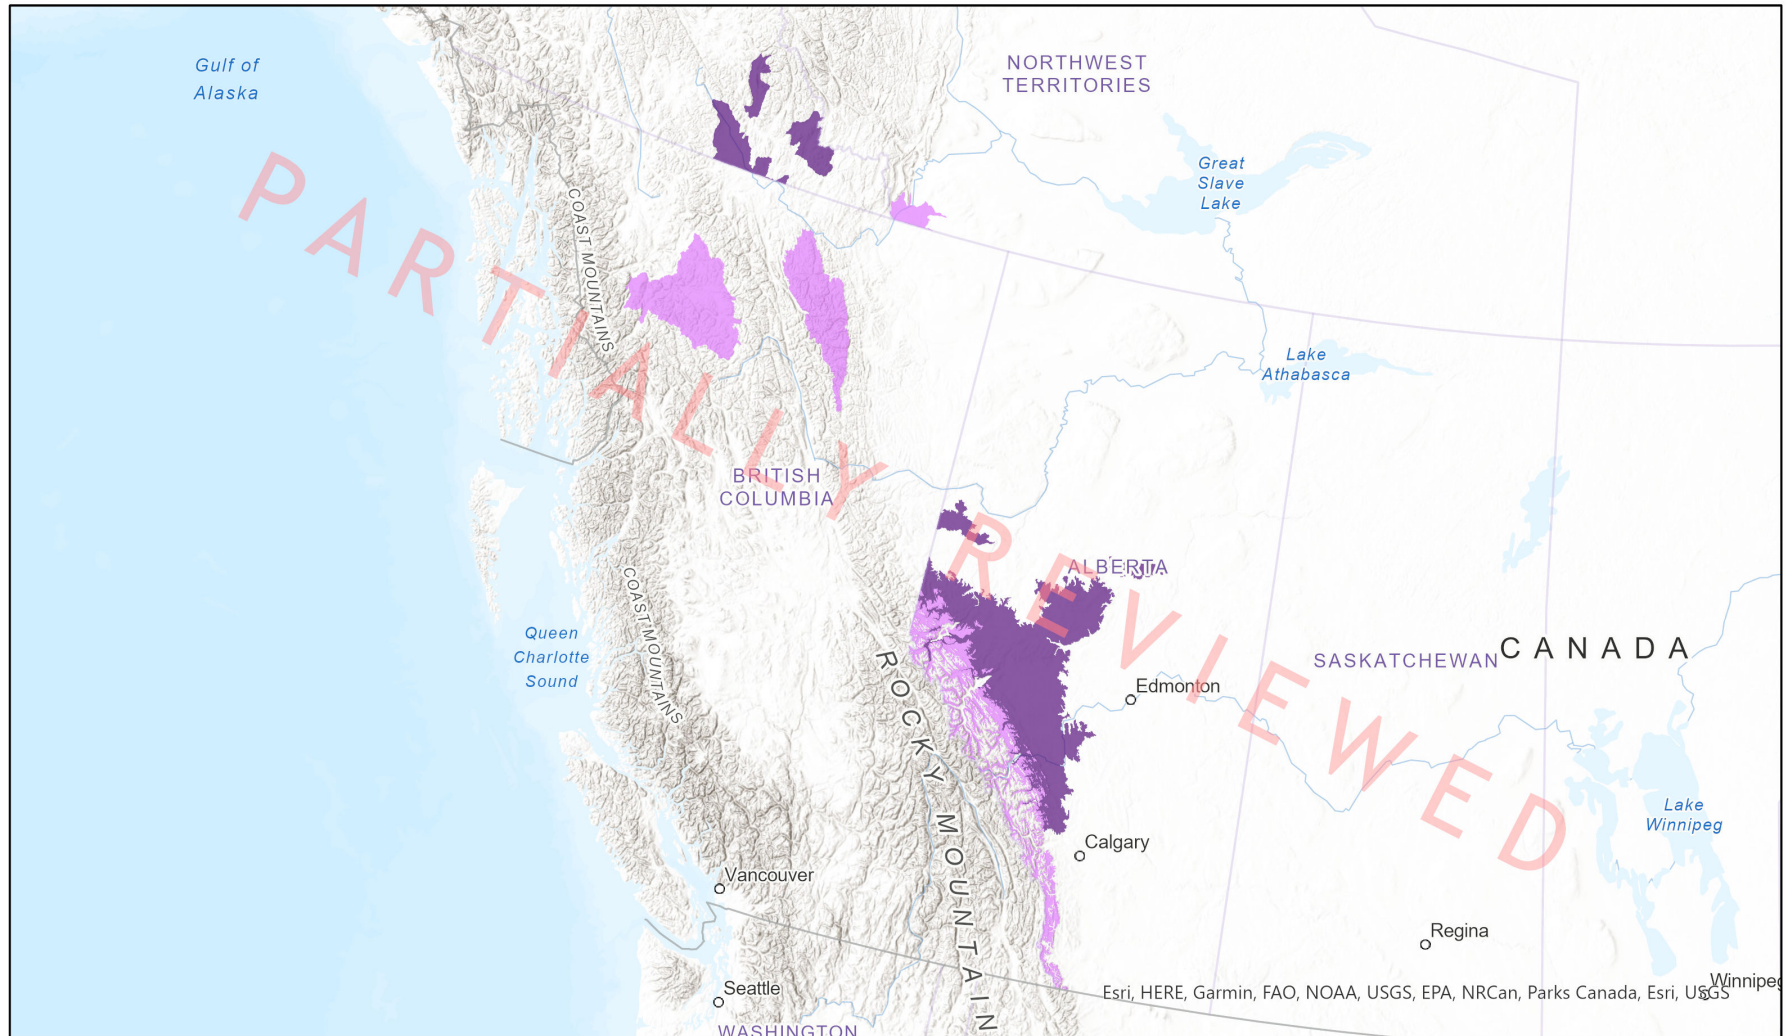

- Present
- Presence Expected
- Historical

## Ecosystem-based Automated Range (EBAR)

Date Generated: December 29, 2020; Version: 1.0; Stage: Expert Reviewed (Partially Reviewed); Scope: Global

Synonyms Used: None

0 280 560 km

Input Records - 2 AB Element Occurrences, 2 BC Element Occurrences, 3 BC Vascular Plant Observations, 5 BISON, 9 GBIF, 2 iDigBio, 3 NCC GBIF Download, 3 YT Element Occurrences, 3 YT Source Feature Polygons; Expert Reviews - 1

Map centre: 121.2071°W 55.4266°N

EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

## Ecosystem-based Automated Range (EBAR) Metadata

---

### Species

National Scientific Name:	Salix raupii
National English Name:	Raup's Willow
National French Name:	Saule de Raup
Element National ID:	206117
Element Global ID:	129981 ( <a href="#">go to NatureServe Explorer</a> )
Element Code:	PDSAL022H0
Endemism Type:	Y

### Rank/Status

Global Rank:	G3 (reviewed August 26, 2016)
National Rank (Canada):	N3 (reviewed 2016)
Subnational Ranks (Canada):	AB=S1, BC=SH, NT=SNR, YT=S2
National Rank (United States):	None
Subnational Ranks (United States):	None
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	None
Canadian COSEWIC Status:	None
US ESA Status:	None

## Range Map

<b>Date Generated:</b>	December 29, 2020
<b>Version:</b>	1.0
<b>Stage:</b>	Expert Reviewed (Partially Reviewed)
<b>Scope:</b>	Global
<b>Metadata:</b>	Primary Species Name - <i>Salix raupii</i> (Flora of North America Editorial Committee, 2010) Input Records - 2 AB Element Occurrences, 2 BC Element Occurrences, 3 BC Vascular Plant Observations, 5 BISON, 9 GBIF, 2 iDigBio, 3 NCC GBIF Download, 3 YT Element Occurrences, 3 YT Source Feature Polygons; Expert Reviews - 1
<b>Comments:</b>	This range has been partially reviewed. The following jurisdictions have been reviewed: British Columbia.
<b>Disclaimer:</b>	Please review our <a href="#">methods document</a> before using EBAR.  EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis.  The absence of data in any geographic areas does not necessarily mean that a species is not present.  An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
<b>Presence Definitions:</b>	Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion.  Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model.  Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).
<b>Map Projection:</b>	North America Albers Equal Area Conic (WKID 4269)
