Ecosystem-based Automated Range (EBAR) Metadata

Species

National Scientific Name:	<i>Orthocarpus bracteosus</i> Benth.
Scientific Name Reference:	Flora of North America Editorial Committee. 2019. Flora of North America North of Mexico. Vol. 17: Magnoliophyta: Tetrachondraceae to Orobanchaceae. Oxford Univ. Press, New York. xxiv + 737 pp.
National English Name:	Rosy Owl-clover
National French Name:	Orthocarpe à épi feuillu
Element National ID:	243376
Element Global ID:	131593 (go to NatureServe Explorer)
Element Code:	PDSCR1H030
Endemism Type:	N
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	816

Rank/Status

Global Rank:	G3? (reviewed February 01, 1998)
National Rank (Canada):	N1 (reviewed 2022)
Subnational Ranks (Canada):	BC=S1
National Rank (United States):	NNR
Subnational Ranks (United States):	CA=S1, MD=SNA, NY=SNA, OR=SNR, WA=S2
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	Endangered/En voie de disparition (July 14, 2005)
Canadian COSEWIC Status:	Endangered (May 01, 2004)
US ESA Status:	None

Range Map

Date Generated:	August 21, 2023
Version:	1.0
Stage:	Expert Reviewed (National)
Scope:	Canadian
Metadata:	Primary Species - <i>Orthocarpus bracteosus</i> Benth. Input Records - 2 BC Non-sensitive Element Occurrences, 7 BC Vascular Plant Observations, 2 BISON, 28 GBIF, 2 iDigBio, 27 iNaturalist.ca, 19 iNaturalist.org; Expert Reviews - BC Experts
Comments:	None Please see spatial data for Ecoshape-level reviewer comments.
Disclaimer:	Please review our methods document before using EBAR. EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis. The absence of data in any geographic areas does not necessarily mean that a species is not present. An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	(Please see Comments above for any exceptions) Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion. Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model. Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).
Usage Type Definitions:	(Please see Comments above for any exceptions) Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion. Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
