Ecosystem-based Automated Range (EBAR)

Date Generated: April 29, 2024; Version: 1.0; Stage: Expert Reviewed (Low Star Rating- National); Scope: Canadian

Map centre: 116.8512°W 51.7595°N © NatureServe Canada 2020 under CC BY 4.0

EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

Ecosystem-based Automated Range (EBAR) Metadata

Species

National Scientific Name: Douglasia montana Gray

Scientific Name Reference: Flora of North America Editorial Committee (FNA). 2009. Flora of North America north of Mexico. Vol. 8. Magnoliophyta:

Paeoniaceae to Ericaceae. Oxford University Press, New York. xxiv + 585 pp.

National English Name: Rocky Mountain Dwarf Primrose

National French Name: Douglasie montagnarde

Element National ID: 239984

Element Global ID: 133617 (go to NatureServe Explorer)

Element Code: PDPRI04040

Endemism Type: N

Canadian COSEWIC Name:

Canadian COSEWIC ID:

Rank/Status

Global Rank: G4 (reviewed June 16, 2015)

National Rank (Canada): N1 (reviewed 2022)

Subnational Ranks (Canada): AB=S1

National Rank (United States): N4?

Subnational Ranks (United States): ID=SNR, MT=S4, WY=S3

National Rank (Mexico): None

Subnational Ranks (Mexico): None

Canadian SARA Status: None

Canadian COSEWIC Status: None

US ESA Status: None

Range Map

Version: 1.0

Stage: Expert Reviewed (Low Star Rating- National)

Scope: Canadian

Metadata: Primary Species - Douglasia montana Gray

Input Records - 2 AB Element Occurrences, 4 AB Source Feature Polygons, 1 GBIF, 3 iNaturalist.ca, 1 iNaturalist.ca

(original coordinates for obscured records); Expert Reviews - Vladimir Kricsfalusy

Comments: This range has a low star rating. In Canada, this species is known only from Waterton Lakes National Park in Alberta.

This range overestimates the species true distribution in Canada.

Disclaimer: Please review our <u>methods document</u> before using EBAR.

EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended

for all types of applications and analysis.

The absence of data in any geographic areas does not necessarily mean that a species is not present.

An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic

area.

Presence Definitions: (Please see Comments above for any exceptions)

Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source

Features, Canadian Federal Critical Habitat, or expert opinion.

Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a

habitat suitability model.

Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an

Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).

Usage Type Definitions: (Please see Comments above for any exceptions)

Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert

opinion.

Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction

Breeding and Behaviour Codes, or on expert opinion.

Map Projection: North America Albers Equal Area Conic (WKID 4269)
