Species

National Scientific Name:	<i>Scleria triglomerata</i> Michx.
Scientific Name Reference:	Flora of North America Editorial Committee (FNA). 2002b. Flora of North America north of Mexico. Vol. 23. Magnoliophyta: Commelinidae (in part): Cyperaceae. Oxford Univ. Press, New York. xxiv + 608 pp.
National English Name:	Whip Nutrush
National French Name:	Sclérie à trois glomérules
Element National ID:	234584
Element Global ID:	133750 (go to NatureServe Explorer)
Element Code:	PMCYP0R0R0
Endemism Type:	N
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	

Rank/Status

Global Rank:	G5 (reviewed April 03, 2024)
National Rank (Canada):	N1 (reviewed 2022)

Metadata:	Primary Species - <i>Scleria triglomerata</i> Michx. Input Records - 9 GBIF, 33 iNaturalist.ca, 5 iNaturalist.ca (original coordinates for obscured records), 2 iNaturalist.org, 10 ON Element Occurrences, 143 ON Observations and Source Features; Expert Reviews - Wasył Bakowsky
Comments:	None Please see spatial data for Ecoshape-level reviewer comments.
Disclaimer:	Please review our methods document before using EBAR. EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis. The absence of data in any geographic areas does not necessarily mean that a species is not present. An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	(Please see Comments above for any exceptions) Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion. Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model. Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?), or expert opinion that the species is extirpated or historical.
Usage Type Definitions:	(Please see Comments above for any exceptions) Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion. Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
