EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

Input Records - 1 BC Non-sensitive Element Occurrences, 1 BC Vascular Plant Observations, 1 GBIF; Expert Reviews - James Miskelly

Ecosystem-based Automated Range (EBAR) Metadata

Species

| | |
|----------------------------|---|
| National Scientific Name: | <i>Sabulina pusilla</i> (S. Watson) Dillenberger & Kadereit |
| Scientific Name Reference: | Dillenberger, M.S., and J.W. Kadereit 2014. Maximum polyphyly: Multiple origins and delimitation with plesiomorphic characters require a new circumscription of <i>Minuartia</i> (Caryophyllaceae). Taxon 63(1): 64-88. |
| National English Name: | Dwarf Stitchwort |
| National French Name: | Sabline naine |
| Element National ID: | 230242 |
| Element Global ID: | 136164 (go to NatureServe Explorer) |
| Element Code: | PDCAR0G0Q2 |
| Endemism Type: | N |
| Canadian COSEWIC Name: | <i>Minuartia pusilla</i> |
| Canadian COSEWIC ID: | 815 |

Rank/Status

| | |
|------------------------------------|---|
| Global Rank: | G3G5 (reviewed June 21, 2004) |
| National Rank (Canada): | N1 (reviewed 2022) |
| Subnational Ranks (Canada): | BC=S1 |
| National Rank (United States): | NNR |
| Subnational Ranks (United States): | CA=SNR, ID=SNR, NV=S2, OR=SNR, UT=S1, WA=S1 |
| National Rank (Mexico): | None |
| Subnational Ranks (Mexico): | None |
| Canadian SARA Status: | Endangered/En voie de disparition (July 14, 2005) |
| Canadian COSEWIC Status: | Endangered (May 01, 2004) |
| US ESA Status: | None |

Range Map

| | |

| Date Generated: | April 03, 2022 |
| Version: | 1.0 |
| Stage: | Expert Reviewed (Low Star Rating) |
| Scope: | Canadian |
| Metadata: | Primary Species Name - <i>Sabulina pusilla</i> (S. Watson) Dillenberger & Kadereit Input Records - 1 BC Non-sensitive Element Occurrences, 1 BC Vascular Plant Observations, 1 GBIF; Expert Reviews - James Miskelly |
| Comments: | This map overestimates the species range extent. This range has a low star rating. |
| Disclaimer: | <p>Please review our methods document before using EBAR.</p> <p>EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis.</p> <p>The absence of data in any geographic areas does not necessarily mean that a species is not present.</p> <p>An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.</p> |
| Presence Definitions: | <p>(Please see Comments above for any exceptions)</p> <p>Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion.</p> <p>Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model.</p> <p>Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).</p> |
| Usage Type Definitions: | <p>(Please see Comments above for any exceptions)</p> <p>Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion.</p> <p>Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.</p> |
| Map Projection: | North America Albers Equal Area Conic (WKID 4269) |
