

# *Lasthenia glaberrima*

## Ecosystem-based Automated Range (EBAR)

Date Generated: April 3, 2022; Version: 1.0; Stage: Expert Reviewed (Low Star Rating); Scope: Canadian

Synonyms Used: None

Esri, CGIAR, USGS, WA State Parks GIS, Esri Canada, Esri, TomTom, Garmin, SafeGraph, FAO, METI/  
NASA, USGS, Bureau of Land Management, EPA, NPS, USFWS, NRCAN, Parks Canada

Input Records - 1 BC Non-sensitive Element Occurrences, 1 BC Vascular Plant Observations, 1 ECCC Critical Habitat; Expert Reviews - James Miskelly

Map centre: 123.4943°W 48.7923°N

EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

## Ecosystem-based Automated Range (EBAR) Metadata

---

### Species

National Scientific Name:	<i>Lasthenia glaberrima</i> DC.
Scientific Name Reference:	Kartesz, J.T. 1994. A synonymized checklist of the vascular flora of the United States, Canada, and Greenland. 2nd edition. 2 vols. Timber Press, Portland, OR.
National English Name:	Rayless Goldfields
National French Name:	Lasthénie glabre
Element National ID:	728468
Element Global ID:	138802 ( <a href="#">go to NatureServe Explorer</a> )
Element Code:	PDAST5L090
Endemism Type:	N
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	1015

## Rank/Status

Global Rank:	G5 (reviewed January 16, 1990)
National Rank (Canada):	NX (reviewed 2017)
Subnational Ranks (Canada):	BC= SX
National Rank (United States):	NNR
Subnational Ranks (United States):	CA= SNR, OR= SNR, WA= S1
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	Endangered/En voie de disparition (February 23, 2010)
Canadian COSEWIC Status:	Endangered (April 25, 2008)
US ESA Status:	None

## Range Map

Date Generated:	April 03, 2022
Version:	1.0
Stage:	Expert Reviewed (Low Star Rating)
Scope:	Canadian
Metadata:	Primary Species Name - <i>Lasthenia glaberrima</i> DC. Input Records - 1 BC Non-sensitive Element Occurrences, 1 BC Vascular Plant Observations, 1 ECCC Critical Habitat; Expert Reviews - James Miskelly
Comments:	This map overestimates the species range extent. This range has a low star rating.
Disclaimer:	<p>Please review our <a href="#">methods document</a> before using EBAR.</p> <p>EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis.</p> <p>The absence of data in any geographic areas does not necessarily mean that a species is not present.</p> <p>An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.</p>
Presence Definitions:	<p>(Please see Comments above for any exceptions)</p> <p>Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion.</p> <p>Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model.</p> <p>Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).</p>
Usage Type Definitions:	<p>(Please see Comments above for any exceptions)</p> <p>Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion.</p> <p>Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.</p>
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
