

Drosera filiformis

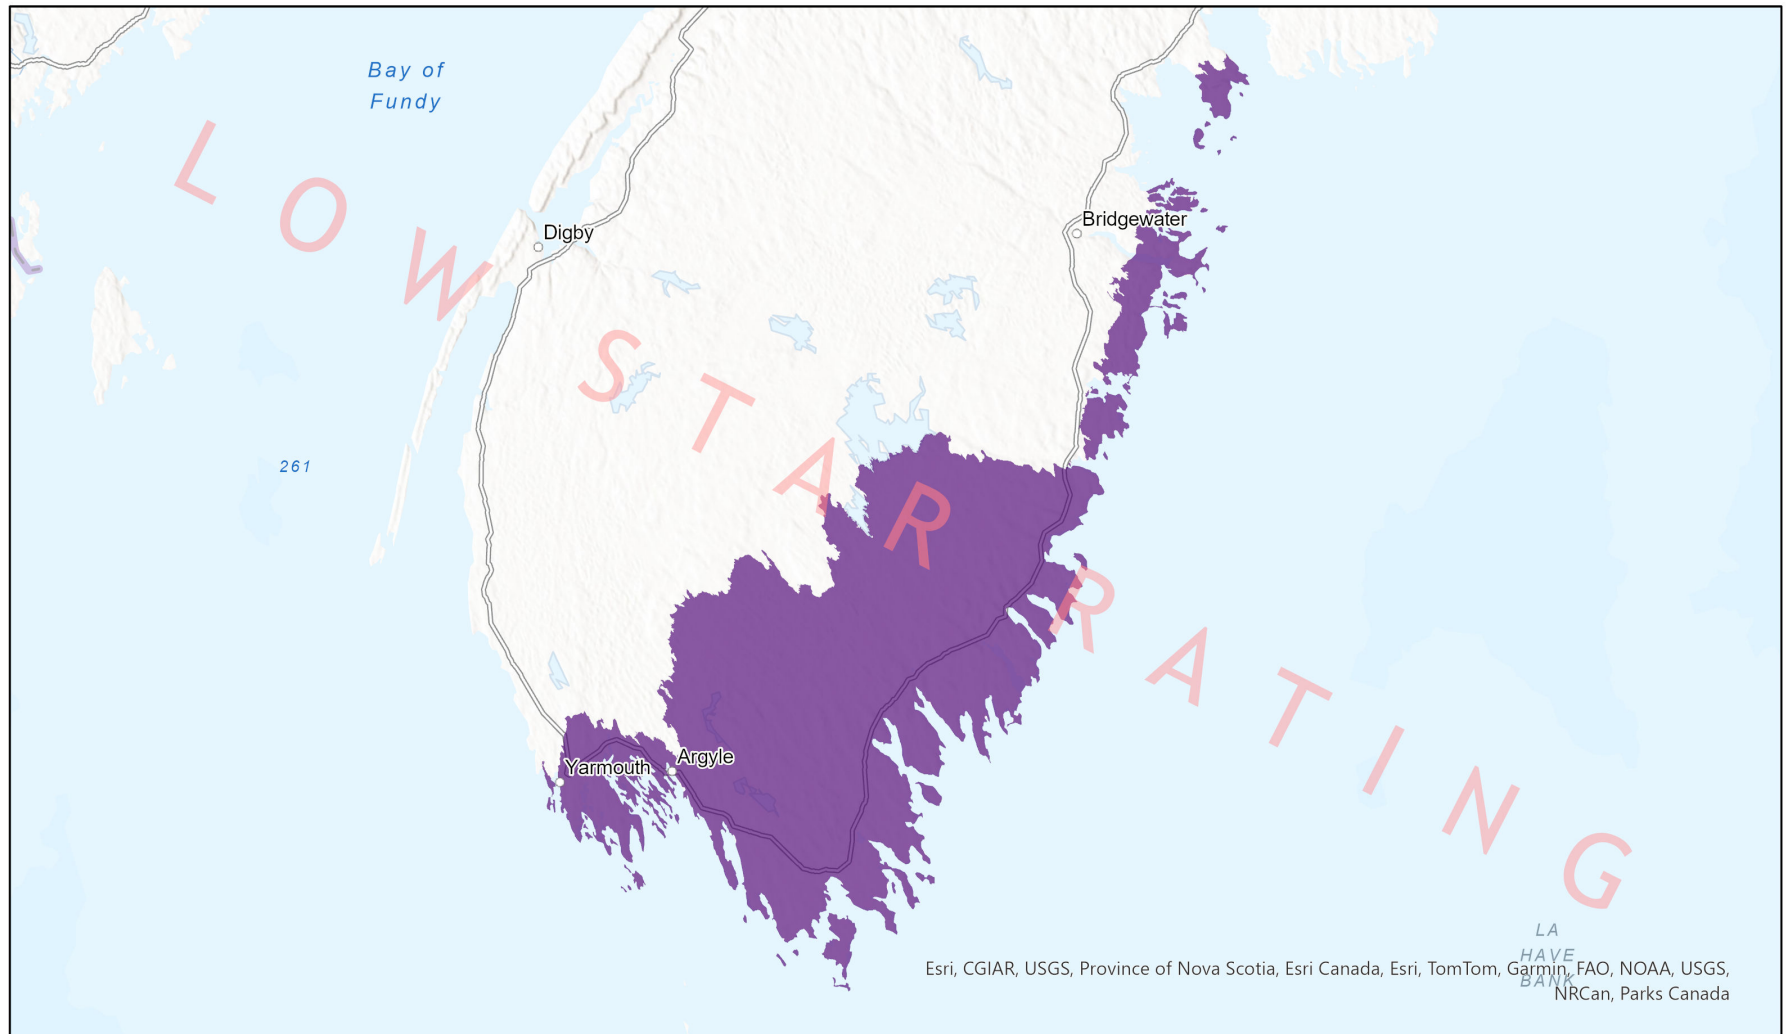

- Present
- Presence Expected
- Historical

Ecosystem-based Automated Range (EBAR)

Date Generated: January 16, 2023; Version: 1.0; Stage: Expert Reviewed (Low Star Rating- National); Scope:

Synonyms Used: None

0 25 50 km

Input Records - 924 ACCDC Observations, 2 BISON, 6 ECCC Critical Habitat, 31 GBIF, 22 iNaturalist.ca, 3 iNaturalist.org; Expert Reviews - Sean Blaney

Map centre: 65.159°W 44.049°N

EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

Ecosystem-based Automated Range (EBAR) Metadata

Species

National Scientific Name:	<i>Drosera filiformis</i> Raf.
Scientific Name Reference:	Flora of North America Editorial Committee. 2015. Flora of North America North of Mexico. Vol. 6. Magnoliophyta: Cucurbitaceae to Droseraceae. Oxford University Press, New York. 496 pp + xxiv.
National English Name:	Thread-leaved Sundew
National French Name:	Droséra filiforme
Element National ID:	235514
Element Global ID:	140608 (go to NatureServe Explorer)
Element Code:	PDDRO020D0
Endemism Type:	N
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	197

Rank/Status

Global Rank:	G4 (reviewed November 19, 2010)
National Rank (Canada):	N2 (reviewed 2022)
Subnational Ranks (Canada):	NS=S2
National Rank (United States):	N4 (reviewed 2010)
Subnational Ranks (United States):	CT=SH, DE= SX, FL=SNR, MA=S4, MD=SNA, NC=S2, NJ=S4, NY=S2, PA=SNA, RI=SH, SC=SNR, WV=SNA
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	Endangered/En voie de disparition (June 05, 2003)
Canadian COSEWIC Status:	Endangered (May 01, 2001)
US ESA Status:	None

Range Map

Date Generated:	January 16, 2023
Version:	1.0
Stage:	Expert Reviewed (Low Star Rating- National)
Scope:	Canadian
Metadata:	Primary Species - <i>Drosera filiformis</i> Raf. Input Records - 924 ACCDC Observations, 2 BISON, 6 ECCC Critical Habitat, 31 GBIF, 22 iNaturalist.ca, 3 iNaturalist.org; Expert Reviews - Sean Blaney
Comments:	This range has a low star rating.
Disclaimer:	<p>Please review our methods document before using EBAR.</p> <p>EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis.</p> <p>The absence of data in any geographic areas does not necessarily mean that a species is not present.</p> <p>An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.</p>
Presence Definitions:	<p>(Please see Comments above for any exceptions)</p> <p>Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion.</p> <p>Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model.</p> <p>Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).</p>
Usage Type Definitions:	<p>(Please see Comments above for any exceptions)</p> <p>Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion.</p> <p>Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.</p>
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
