EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

## Ecosystem-based Automated Range (EBAR) Metadata

---

### Species

National Scientific Name:	<i>Pinus flexilis</i> James
Scientific Name Reference:	Flora of North America Editorial Committee. 1993a. Flora of North America north of Mexico. Vol. 2. Pteridophytes and gymnosperms. Oxford Univ. Press, New York. xvi + 475 pp.
National English Name:	Limber Pine
National French Name:	Pin flexible
Element National ID:	233021
Element Global ID:	140758 ( <a href="#">go to NatureServe Explorer</a> )
Element Code:	PGPIN040F0
Endemism Type:	N

### Rank/Status

Global Rank:	G4 (reviewed November 01, 2011)
National Rank (Canada):	N3 (reviewed 2018)
Subnational Ranks (Canada):	AB=S3, BC=S2S3
National Rank (United States):	N4 (reviewed 2009)
Subnational Ranks (United States):	AZ=SNR, CA=SNR, CO=SNR, ID=SNR, MT=S5, ND=S1, NE=S1, NM=SNR, NV=SNR, OR=S2?, SD=S1, UT=SNR, WY=S4
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	None
Canadian COSEWIC Status:	Endangered (November 28, 2014)
US ESA Status:	None

## Range Map

<b>Date Generated:</b>	March 25, 2022
<b>Version:</b>	1.0
<b>Stage:</b>	Expert Reviewed (Low Star Rating)
<b>Scope:</b>	Canadian
<b>Metadata:</b>	Primary Species Name - <i>Pinus flexilis</i> James Input Records - 277 AB Element Occurrences, 14 BC Incidental Observations, 33 BC Non-sensitive Element Occurrences, 38 BISON, 85 GBIF, 105 iNaturalist.ca, 98 iNaturalist.org, 1 Manitoba Museum; Expert Reviews - Varina Crisfield
<b>Comments:</b>	This range over estimates the distribution of this species. This range has a low star rating.
<b>Disclaimer:</b>	Please review our <a href="#">methods document</a> before using EBAR.  EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis.  The absence of data in any geographic areas does not necessarily mean that a species is not present.  An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
<b>Presence Definitions:</b>	Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion.  Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model.  Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).
<b>Map Projection:</b>	North America Albers Equal Area Conic (WKID 4269)
