

# *Polemonium vanbruntiae*

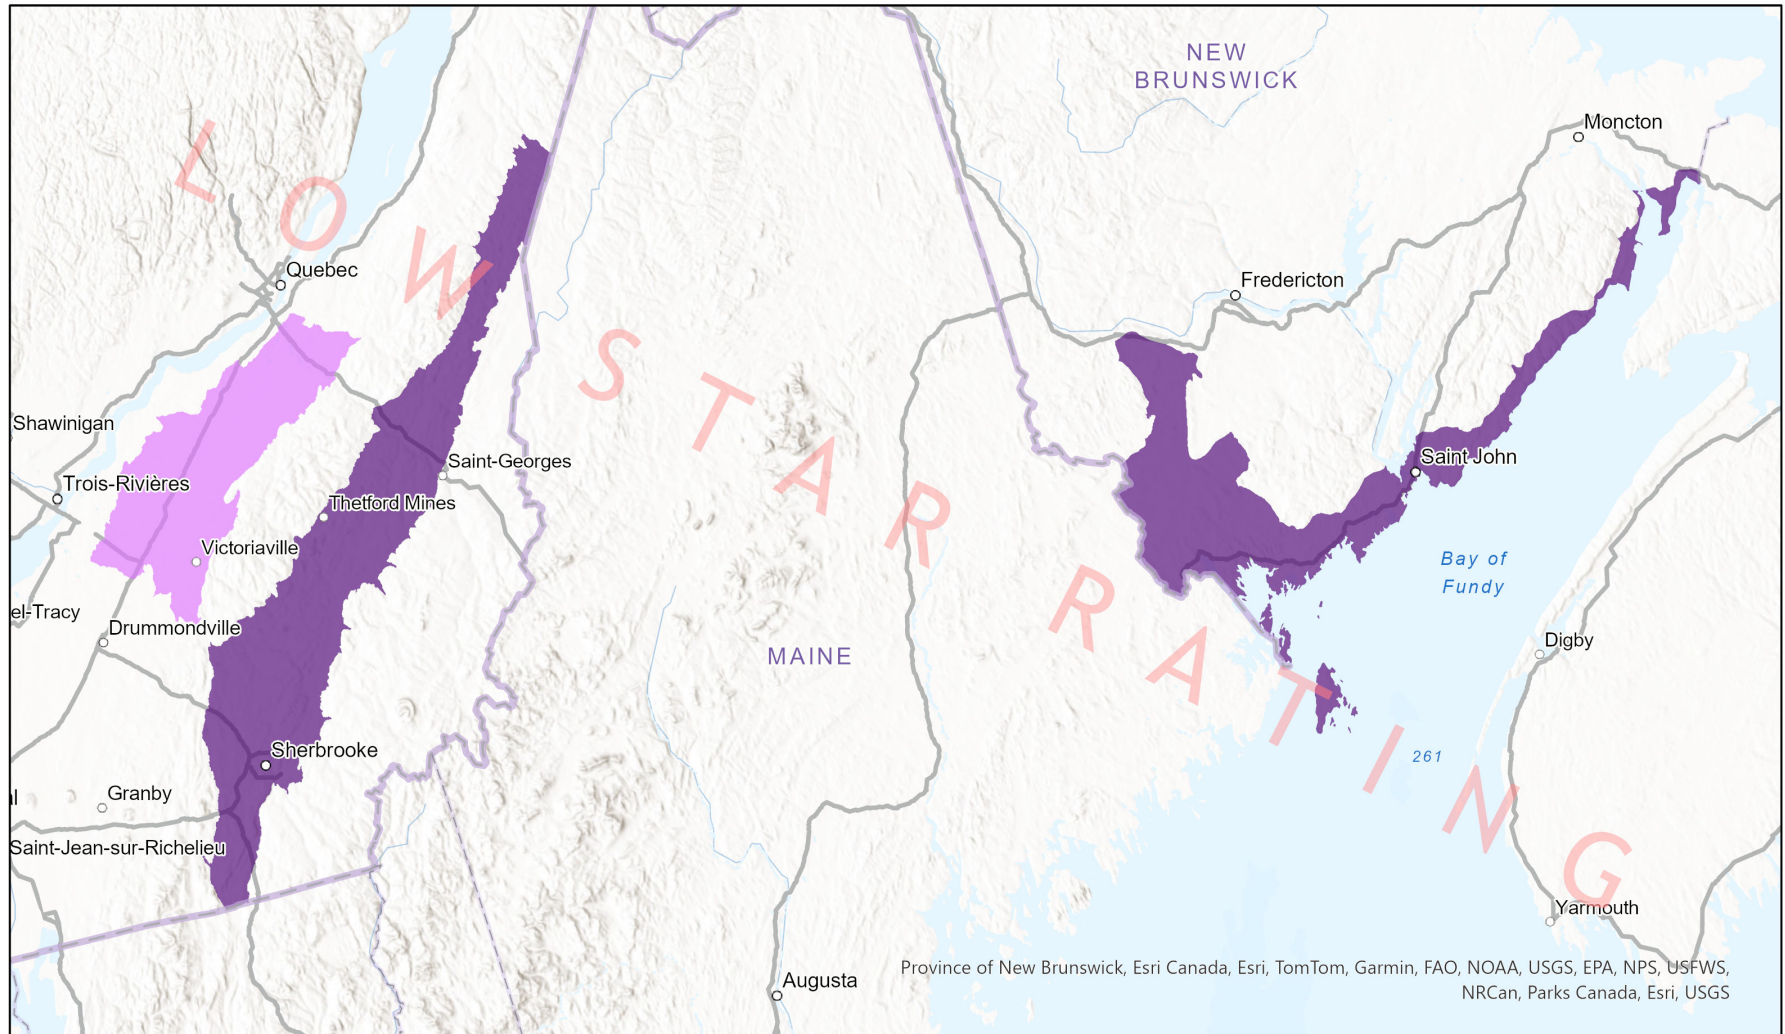

## Ecosystem-based Automated Range (EBAR)

Date Generated: January 11, 2023; Version: 1.0; Stage: Expert Reviewed (Low Star Rating- National); Scope:

Synonyms Used: None

- Present
- Presence Expected
- Historical

0 50 100 km

Input Records - 74 ACCDC Observations, 6 BISON, 15 ECCC Critical Habitat, 8 GBIF, 3 iNaturalist.ca, 13 QC Element Occurrences; Expert Reviews - Sean Blaney, 1 Anonymous

Map centre: 68.5787° W 45.6032° N

EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

## Ecosystem-based Automated Range (EBAR) Metadata

---

### Species

National Scientific Name:	<i>Polemonium vanbruntiae</i> Britt.
Scientific Name Reference:	Kartesz, J.T. 1994. A synonymized checklist of the vascular flora of the United States, Canada, and Greenland. 2nd edition. 2 vols. Timber Press, Portland, OR.
National English Name:	Van Brunt's Jacob's-ladder
National French Name:	Polémoine de Van Brunt
Element National ID:	207313
Element Global ID:	143556 ( <a href="#">go to NatureServe Explorer</a> )
Element Code:	PDPLM0E0LO
Endemism Type:	N
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	234

## Rank/Status

<b>Global Rank:</b>	G3G4 (reviewed September 29, 2005)
<b>National Rank (Canada):</b>	N2 (reviewed 2023)
<b>Subnational Ranks (Canada):</b>	NB=S1, QC=S2
<b>National Rank (United States):</b>	N3
<b>Subnational Ranks (United States):</b>	MD=S2, ME=S1, NJ=SX.1, NY=S3, PA=S1, VT=S2, WV=S2
<b>National Rank (Mexico):</b>	None
<b>Subnational Ranks (Mexico):</b>	None
<b>Canadian SARA Status:</b>	Threatened/Menacée (January 12, 2005)
<b>Canadian COSEWIC Status:</b>	Threatened (November 01, 2002)
<b>US ESA Status:</b>	None

## Range Map

<b>Date Generated:</b>	January 11, 2023
<b>Version:</b>	1.0
<b>Stage:</b>	Expert Reviewed (Low Star Rating- National)
<b>Scope:</b>	Canadian
<b>Metadata:</b>	Primary Species - <i>Polemonium vanbruntiae</i> Britt. Input Records - 74 ACCDC Observations, 6 BISON, 15 ECCC Critical Habitat, 8 GBIF, 3 iNaturalist.ca, 13 QC Element Occurrences; Expert Reviews - Sean Blaney, 1 Anonymous
<b>Comments:</b>	This range has a low star rating.
<b>Disclaimer:</b>	Please review our <a href="#">methods document</a> before using EBAR.  EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis.  The absence of data in any geographic areas does not necessarily mean that a species is not present.  An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
<b>Presence Definitions:</b>	(Please see Comments above for any exceptions)  Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion.  Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model.  Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).
<b>Usage Type Definitions:</b>	(Please see Comments above for any exceptions)  Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion.  Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
<b>Map Projection:</b>	North America Albers Equal Area Conic (WKID 4269)
