EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

# Ecosystem-based Automated Range (EBAR) Metadata

## Species

National Scientific Name:	Solidago gillmanii (A. Gray) Steele
Scientific Name Reference:	Semple, J.C. and J. Peirson. 2013. A revised nomenclature for the <i>Solidago simplex</i> complex (Asteraceae: Astereae). Phytoneuron 2013-41. 1-5. Published 1 July 2013. ISSN 2153 733X. Available at: <http: 2013phytoneuron="" 41phyton-solidagosimplex.pdf="" www.phytoneuron.net=""></http:>
National English Name:	Gillman's Goldenrod
National French Name:	Verge d'or de Gillman
Element National ID:	204598
Element Global ID:	144550 ( <u>go to NatureServe Explorer</u> )
Element Code:	PDAST8P2U2
Endemism Type:	Ν
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	1486

## Rank/Status

Global Rank:	G5T3? (reviewed February 28, 2003)
National Rank (Canada):	N1 (reviewed 2022)
Subnational Ranks (Canada):	ON=S1
National Rank (United States):	N3?
Subnational Ranks (United States):	IN=S2, MI=SNR, WI=S2
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	None
Canadian COSEWIC Status:	Endangered (November 01, 2019)
US ESA Status:	None

## Range Map

Date Generated:	February 13, 2024
Version:	1.0
Stage:	Expert Reviewed (National)
Scope:	Canadian
Metadata:	Primary Species - Solidago gillmanii (A. Gray) Steele; Synonyms - Solidago gillmani (A. Gray, 1882) Input Records - 6 BISON, 8 GBIF, 5 ON Element Occurrences, 14 ON Observations and Source Features; Expert Reviews - Wasyl Bakowsky
Comments:	None <u>Please see spatial data for Ecoshape-level reviewer comments</u> .
Disclaimer:	Please review our methods document before using EBAR.
	EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis.
	The absence of data in any geographic areas does not necessarily mean that a species is not present.
	An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	(Please see Comments above for any exceptions)
	Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion.
	Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model.
	Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).
Usage Type Definitions:	(Please see Comments above for any exceptions)
	Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion.
	Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
