EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

## Ecosystem-based Automated Range (EBAR) Metadata

---

### Species

National Scientific Name:	<i>Juncus kelloggii</i> Engelm.
Scientific Name Reference:	Flora of North America Editorial Committee. 2000. Flora of North America north of Mexico. Vol. 22. Magnoliophyta: Alismatidae, Arecidae, Commelinidae (in part), and Zingiberidae. Oxford Univ. Press, New York. xxiii + 352 pp.
National English Name:	Kellogg's Rush
National French Name:	Jonc de Kellogg
Element National ID:	245213
Element Global ID:	148399 ( <a href="#">go to NatureServe Explorer</a> )
Element Code:	PMJUN011K0
Endemism Type:	N
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	767

## Rank/Status

Global Rank:	G3? (reviewed January 16, 1990)
National Rank (Canada):	N1N2 (reviewed 2022)
Subnational Ranks (Canada):	BC=S1S2
National Rank (United States):	NNR
Subnational Ranks (United States):	CA=SNR, OR=S2?, WA=S1
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	Endangered/En voie de disparition (January 12, 2005)
Canadian COSEWIC Status:	Endangered (May 01, 2003)
US ESA Status:	None

## Range Map

Date Generated:	November 05, 2020
Version:	1.0
Stage:	Expert Reviewed
Scope:	Canadian
Metadata:	Primary Species Name - <i>Juncus kelloggii</i> (Flora of North America Editorial Committee, 2000) Input Records - 1 BC Element Occurrences, 2 BC Vascular Plant Observations, 2 BISON, 5 GBIF, 1 U of O Range Map Polygons; Expert Reviews - 1
Comments:	None <a href="#">Please see spatial data for Ecoshape-level reviewer comments.</a>
Disclaimer:	Please review our <a href="#">methods document</a> before using EBAR.  EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis.  The absence of data in any geographic areas does not necessarily mean that a species is not present.  An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	(Please see Comments above for any exceptions)  Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion.  Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model.  Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).
Usage Type Definitions:	(Please see Comments above for any exceptions)  Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion.  Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
