Species

National Scientific Name:	<i>Enemion biternatum</i> Raf.
Scientific Name Reference:	Flora of North America Editorial Committee. 1997. Flora of North America north of Mexico. Vol. 3. Magnoliophyta: Magnoliidae and Hamamelidae. Oxford Univ. Press, New York. xxiii + 590 pp.
National English Name:	Eastern False Rue-anemone
National French Name:	Isopyre à feuilles biternées
Element National ID:	202112
Element Global ID:	150438 (go to NatureServe Explorer)
Element Code:	PDRANOG010
Endemism Type:	N
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	249

Rank/Status

Global Rank:	G5 (reviewed April 09, 1984)
National Rank (Canada):	N2 (reviewed 2023)
Subnational Ranks (Canada):	ON=S2
National Rank (United States):	N5?

Comments:	None Please see spatial data for Ecoshape-level reviewer comments.
Disclaimer:	Please review our methods document before using EBAR. EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis. The absence of data in any geographic areas does not necessarily mean that a species is not present. An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	(Please see Comments above for any exceptions) Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion. Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model. Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).
Usage Type Definitions:	(Please see Comments above for any exceptions) Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion. Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
