

Salix tyrrellii

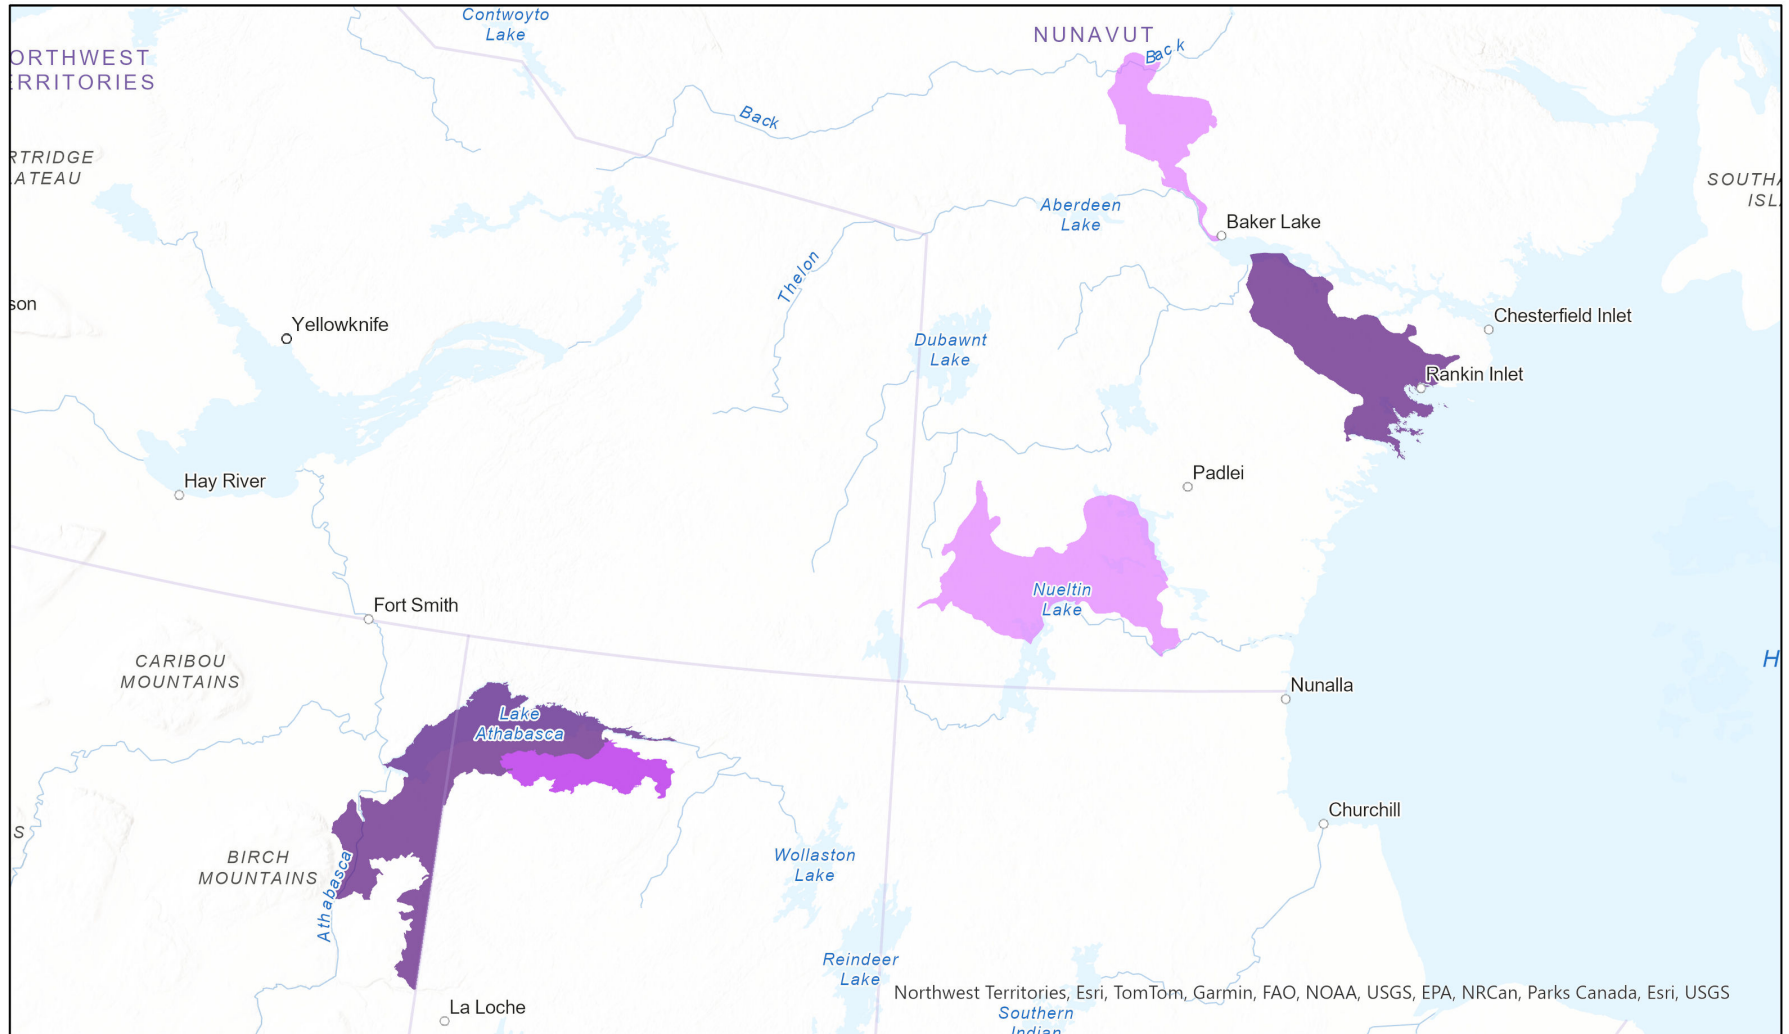

Ecosystem-based Automated Range (EBAR)

Date Generated: March 12, 2024; Version: 1.0; Stage: Expert Reviewed; Scope: Global

Synonyms Used: None

- Present
- Presence Expected
- Historical

Input Records - 6 AB Element Occurrences, 6 AB Source Feature Polygons, 6 BISON, 8 GBIF, 1 iDigBio, 11 NCC GBIF Download, 11 SK Element Occurrences, 11 SK Source Feature Points, 300 SK Source Feature Polygons; Expert Reviews - Eric Lamb, Vladimir Kricsfalussy

EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

Ecosystem-based Automated Range (EBAR) Metadata

Species

National Scientific Name:	<i>Salix tyrrellii</i> Raup
Scientific Name Reference:	Flora of North America Editorial Committee. 2010. Flora of North America North of Mexico. Vol. 7. Magnoliophyta: Salicaceae to Brassicaceae. Oxford University Press, New York. xxii + 797 pp.
National English Name:	Tyrrell's Willow
National French Name:	Saule de Tyrrell
Element National ID:	221001
Element Global ID:	150455 (go to NatureServe Explorer)
Element Code:	PDSAL022B6
Endemism Type:	Y
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	233

Rank/Status

Global Rank:	G5T4 (reviewed November 18, 2022)
National Rank (Canada):	N4 (reviewed 2022)
Subnational Ranks (Canada):	AB=S1, NU=S4, SK=S2
National Rank (United States):	None
Subnational Ranks (United States):	None
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	None
Canadian COSEWIC Status:	Not at Risk (April 01, 1999)
US ESA Status:	None

Range Map

Date Generated:	March 12, 2024
Version:	1.0
Stage:	Expert Reviewed
Scope:	Global
Metadata:	Primary Species - <i>Salix tyrrellii</i> Raup Input Records - 6 AB Element Occurrences, 6 AB Source Feature Polygons, 6 BISON, 8 GBIF, 1 iDigBio, 11 NCC GBIF Download, 11 SK Element Occurrences, 11 SK Source Feature Points, 300 SK Source Feature Polygons; Expert Reviews - Eric Lamb, Vladimir Kricsfalusy
Comments:	None Please see spatial data for Ecoshape-level reviewer comments.
Disclaimer:	Please review our methods document before using EBAR. EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis. The absence of data in any geographic areas does not necessarily mean that a species is not present. An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	(Please see Comments above for any exceptions) Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion. Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model. Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).
Usage Type Definitions:	(Please see Comments above for any exceptions) Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion. Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
