

Corallorhiza striata var. *vreelandii*

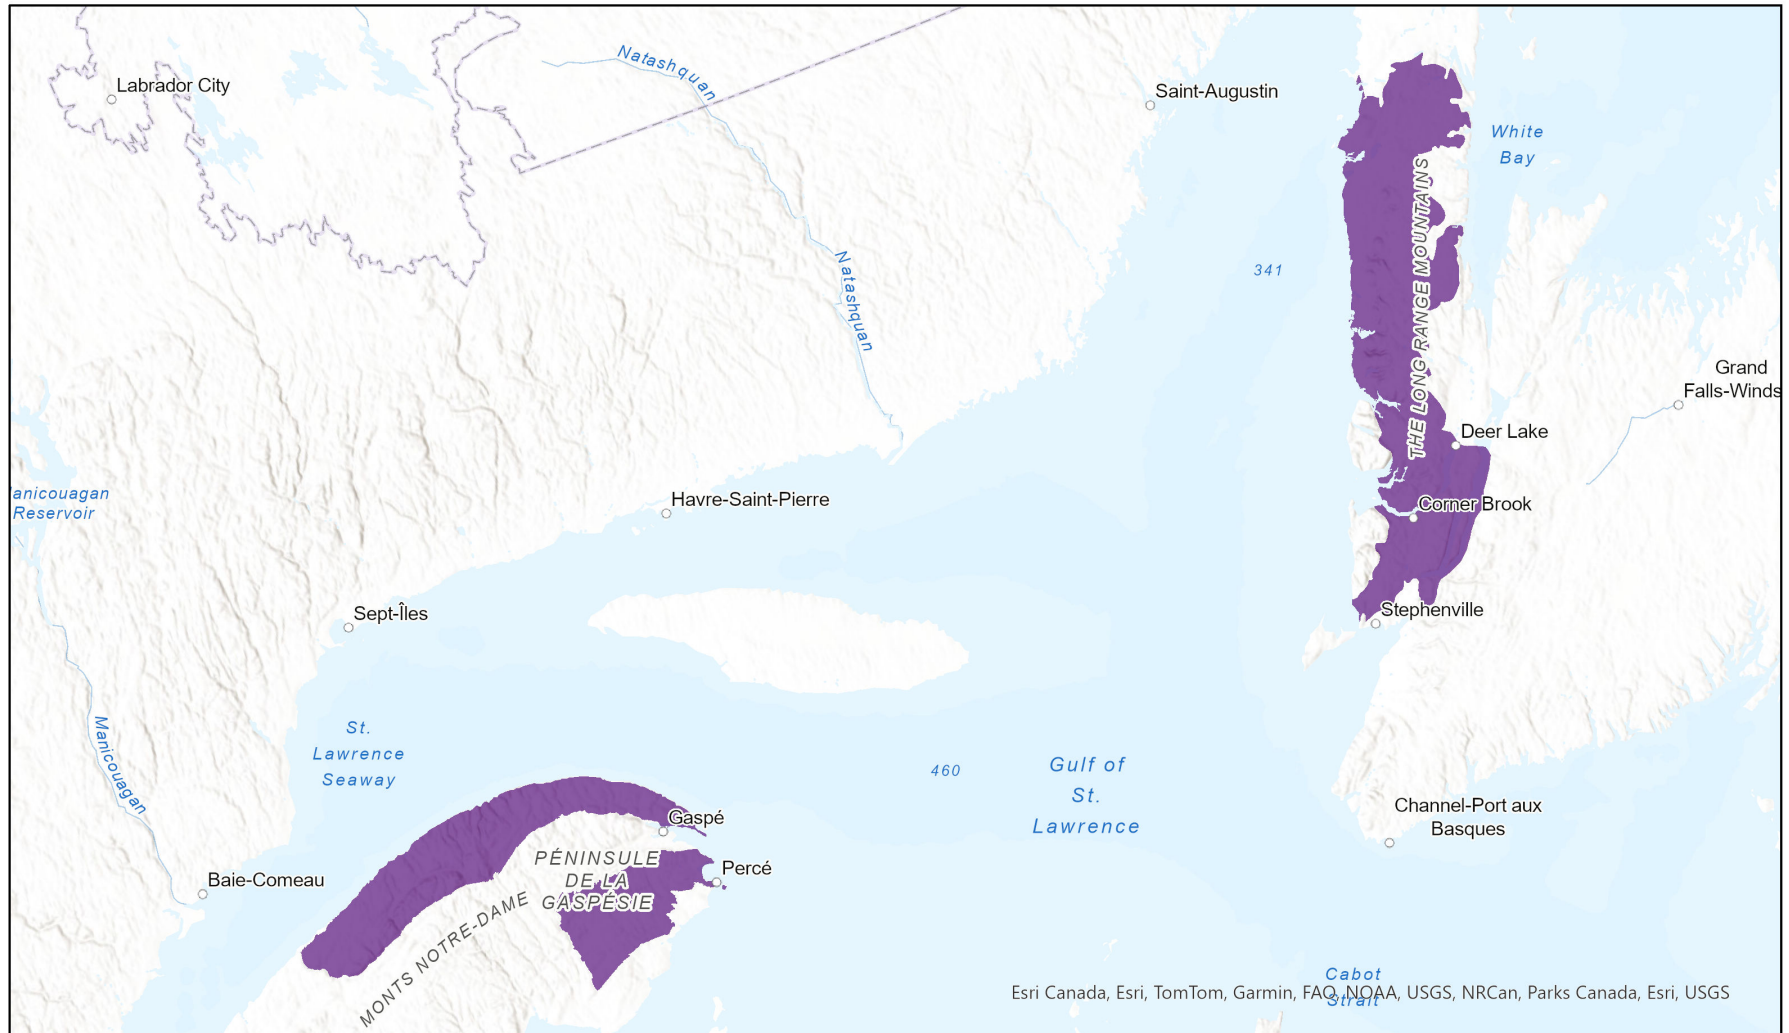

Ecosystem-based Automated Range (EBAR)

- Present
- Presence Expected
- Historical

Date Generated: May 14, 2024; Version: 1.0; Stage: Expert Reviewed (National); Scope: Canadian

Synonyms Used: None

Esri Canada, Esri, TomTom, Garmin, FAO, NOAA, USGS, NRCan, Parks Canada, Esri, USGS

Input Records - 8 ACCDC Observations, 1 iNaturalist.ca (original coordinates for obscured records), 2 QC Element Occurrences; Expert Reviews - Frédéric Coursol, Sean Blaney

Map centre: 61.868°W 49.8361°N

EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

Ecosystem-based Automated Range (EBAR) Metadata

Species

| | |
|----------------------------|--|
| National Scientific Name: | <i>Corallorhiza striata</i> var. <i>vreelandii</i> (Rydb.) L.O. Williams |
| Scientific Name Reference: | Flora of North America Editorial Committee (FNA). 2002a. Flora of North America north of Mexico. Vol. 26. Magnoliophyta: Liliidae: Liliales and Orchidales. Oxford Univ. Press, New York. xxvi + 723 pp. |
| National English Name: | Vreeland's Coralroot |
| National French Name: | Corallorhize de Vreeland |
| Element National ID: | 211159 |
| Element Global ID: | 151255 (go to NatureServe Explorer) |
| Element Code: | PMORCOM042 |
| Endemism Type: | N |
| Canadian COSEWIC Name: | |
| Canadian COSEWIC ID: | |

Rank/Status

| | |
|---|---|
| Global Rank: | G5T3T5 (reviewed October 12, 2012) |
| National Rank (Canada): | N1 (reviewed 2012) |
| Subnational Ranks (Canada): | NF=S1, QC=S1 |
| National Rank (United States): | NNR |
| Subnational Ranks (United States): | AZ=SNR, CA=SNR, CO=SNR, ID=SNR, ND=SNR, NE=S1, NM=SNR, NV=SNR, OR=SNR, SD=SNR, UT=SNR, WA=SNR, WY=S1? |
| National Rank (Mexico): | None |
| Subnational Ranks (Mexico): | None |
| Canadian SARA Status: | None |
| Canadian COSEWIC Status: | None |
| US ESA Status: | None |

Range Map

| | |
|--------------------------------|---|
| Date Generated: | May 14, 2024 |
| Version: | 1.0 |
| Stage: | Expert Reviewed (National) |
| Scope: | Canadian |
| Metadata: | Primary Species - <i>Corallorhiza striata</i> var. <i>vreelandii</i> (Rydb.) L.O. Williams Input Records - 8 ACCDC Observations, 1 iNaturalist.ca (original coordinates for obscured records), 2 QC Element Occurrences; Expert Reviews - Frédéric Coursol, Sean Blaney |
| Comments: | None Please see spatial data for Ecoshape-level reviewer comments. |
| Disclaimer: | Please review our methods document before using EBAR. EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis. The absence of data in any geographic areas does not necessarily mean that a species is not present. An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area. |
| Presence Definitions: | (Please see Comments above for any exceptions) Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion. Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model. Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?). |
| Usage Type Definitions: | (Please see Comments above for any exceptions) Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion. Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion. |
| Map Projection: | North America Albers Equal Area Conic (WKID 4269) |
