

# *Crataegus nitidula*

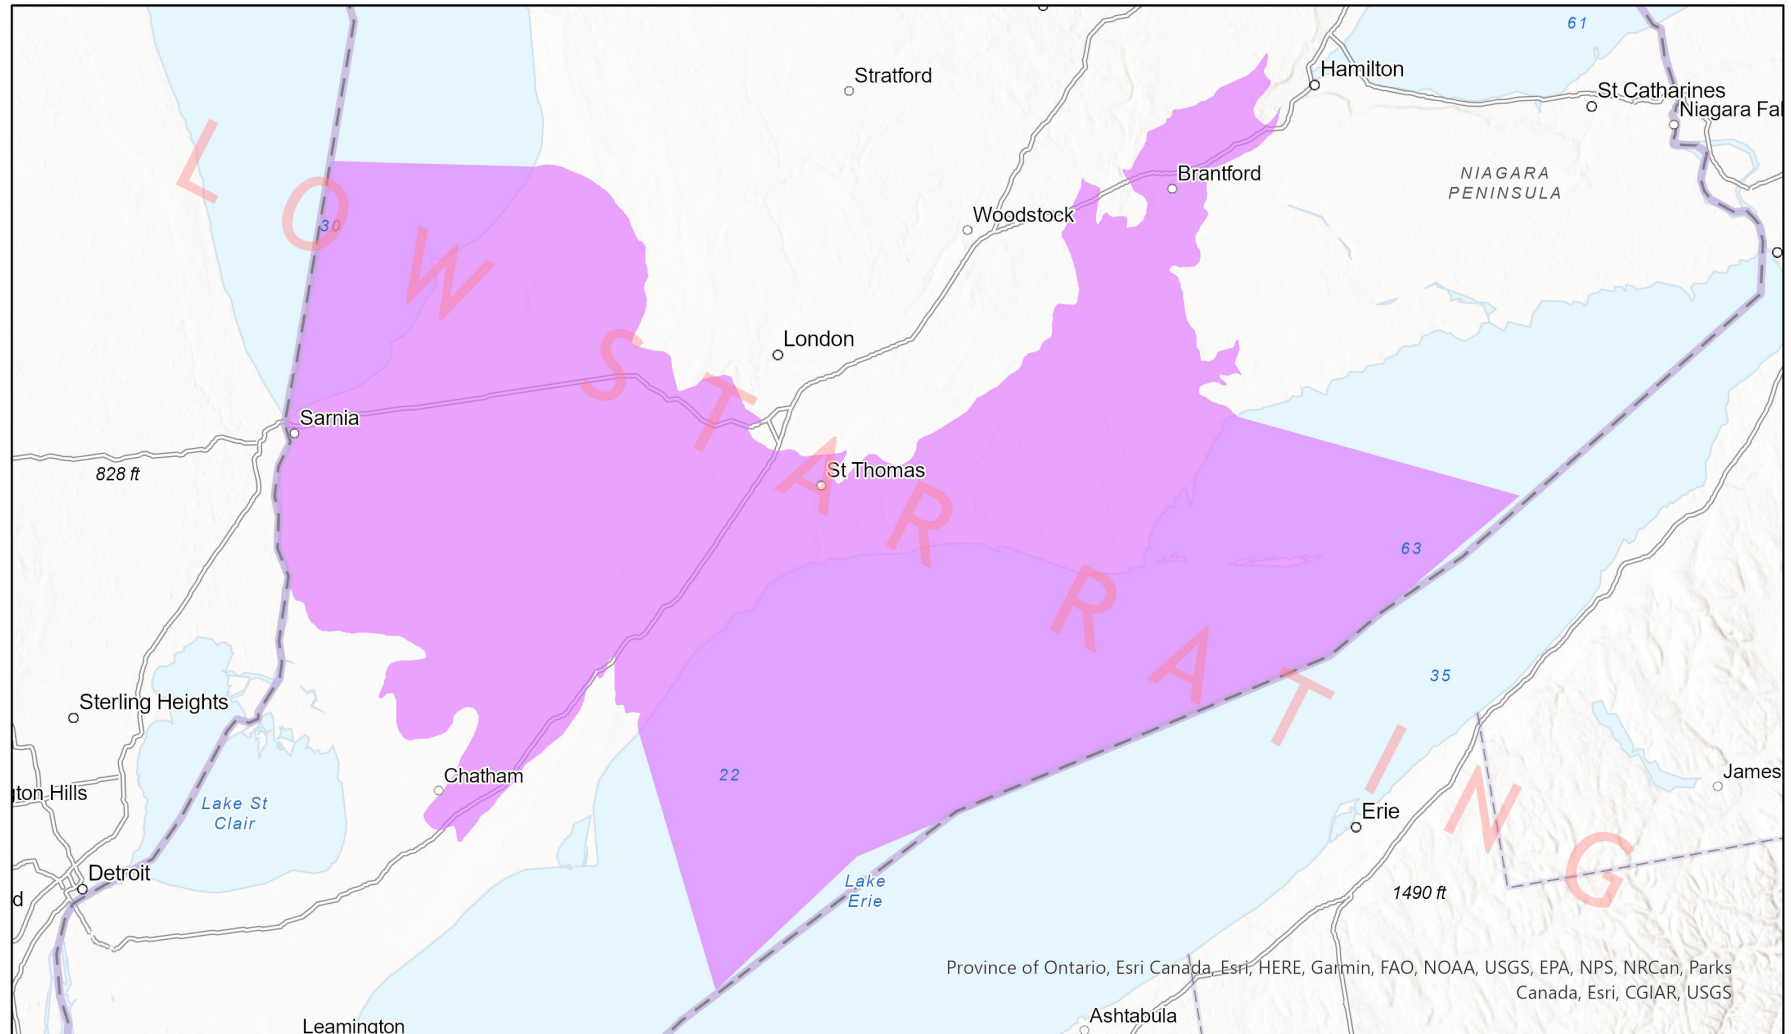

- Present
- Presence Expected
- Historical

## Ecosystem-based Automated Range (EBAR)

Date Generated: July 3, 2020; Version: 1.0; Stage: Expert Reviewed (Low Star Rating); Scope: Canadian

Synonyms Used: None

Province of Ontario, Esri Canada, Esri, HERE, Garmin, FAO, NOAA, USGS, EPA, NPS, NRCAN, Parks Canada, Esri, CGIAR, USGS

Input Records - 1 BISON, 5 GBIF, 1 iDigBio; Expert Reviews - 1 (average star rating = 3.0)

Map centre: 81.0287° W 42.7061° N  
© NatureServe Canada 2020 under CC BY 4.0

EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

## Ecosystem-based Automated Range (EBAR) Metadata

---

### Species

National Scientific Name:	Crataegus nitidula
National English Name:	Ontario Hawthorn
National French Name:	Aubépine chatoyante
Element National ID:	194084
Element Global ID:	151531 ( <a href="#">go to NatureServe Explorer</a> )
Element Code:	PDROS0H3K0
Endemism Type:	N

### Rank/Status

Global Rank:	G1G3Q (reviewed September 16, 2016)
National Rank (Canada):	NH (reviewed 2017)
Subnational Ranks (Canada):	ON=SH
National Rank (United States):	N1N3
Subnational Ranks (United States):	MI=SNR, PA=SNR, WI=SNR
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	None
Canadian COSEWIC Status:	None
US ESA Status:	None

## Range Map

<b>Date Generated:</b>	July 03, 2020
<b>Version:</b>	1.0
<b>Stage:</b>	Expert Reviewed (Low Star Rating)
<b>Scope:</b>	Canadian
<b>Metadata:</b>	Primary Species Name - <i>Crataegus nitidula</i> (Flora of North America Editorial Committee, 2014) Input Records - 1 BISON, 5 GBIF, 1 iDigBio; Expert Reviews - 1 (average star rating = 3.0)
<b>Comments:</b>	This range has a low star rating.
<b>Disclaimer:</b>	Please review our <a href="#">methods document</a> before using EBAR.  EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis.  The absence of data in any geographic areas does not necessarily mean that a species is not present.  An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
<b>Presence Definitions:</b>	Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion.  Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model.  Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).
<b>Map Projection:</b>	North America Albers Equal Area Conic (WKID 4269)
