EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

Ecosystem-based Automated Range (EBAR) Metadata

Species

National Scientific Name:	<i>Potamogeton x ogdenii</i> Hellquist & R.L. Hilton
Scientific Name Reference:	Kaplan, Z., V. Jarolímová, and J. Fehrer. 2013. Revision of chromosome numbers of Potamogetonaceae: a new basis for taxonomic and evolutionary implications. <i>Preslia</i> 85: 421-482.
National English Name:	Ogden's Pondweed
National French Name:	Potamot d'Ogden; Potamot de Ogden
Element National ID:	248367
Element Global ID:	151664 (go to NatureServe Explorer)
Element Code:	PMPOT03170
Endemism Type:	N
Canadian COSEWIC Name:	<i>Potamogeton ogdenii</i>
Canadian COSEWIC ID:	967

Rank/Status

Global Rank:	GNA (reviewed June 03, 2020)
National Rank (Canada):	NNA (reviewed 2020)
Subnational Ranks (Canada):	ON=SNA
National Rank (United States):	NNA (reviewed 2020)
Subnational Ranks (United States):	CT=SNA, MA=S1, NY=SNA
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	Endangered/En voie de disparition (March 05, 2009)
Canadian COSEWIC Status:	Endangered (April 22, 2007)
US ESA Status:	None

Range Map

Date Generated:	January 31, 2024

Stage:	Expert Reviewed (Low Star Rating- National)
Scope:	Canadian
Metadata:	Primary Species - <i>Potamogeton x ogdenii</i> Hellquist & R.L. Hilton Input Records - 10 ON Element Occurrences, 14 ON Observations and Source Features; Expert Reviews - Wasyl Bakowsky
Comments:	None
Disclaimer:	Please review our methods document before using EBAR. EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis. The absence of data in any geographic areas does not necessarily mean that a species is not present. An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	(Please see Comments above for any exceptions) Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion. Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model. Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).
Usage Type Definitions:	(Please see Comments above for any exceptions) Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion. Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
