

# *Arnica griscomii* ssp. *griscomii*

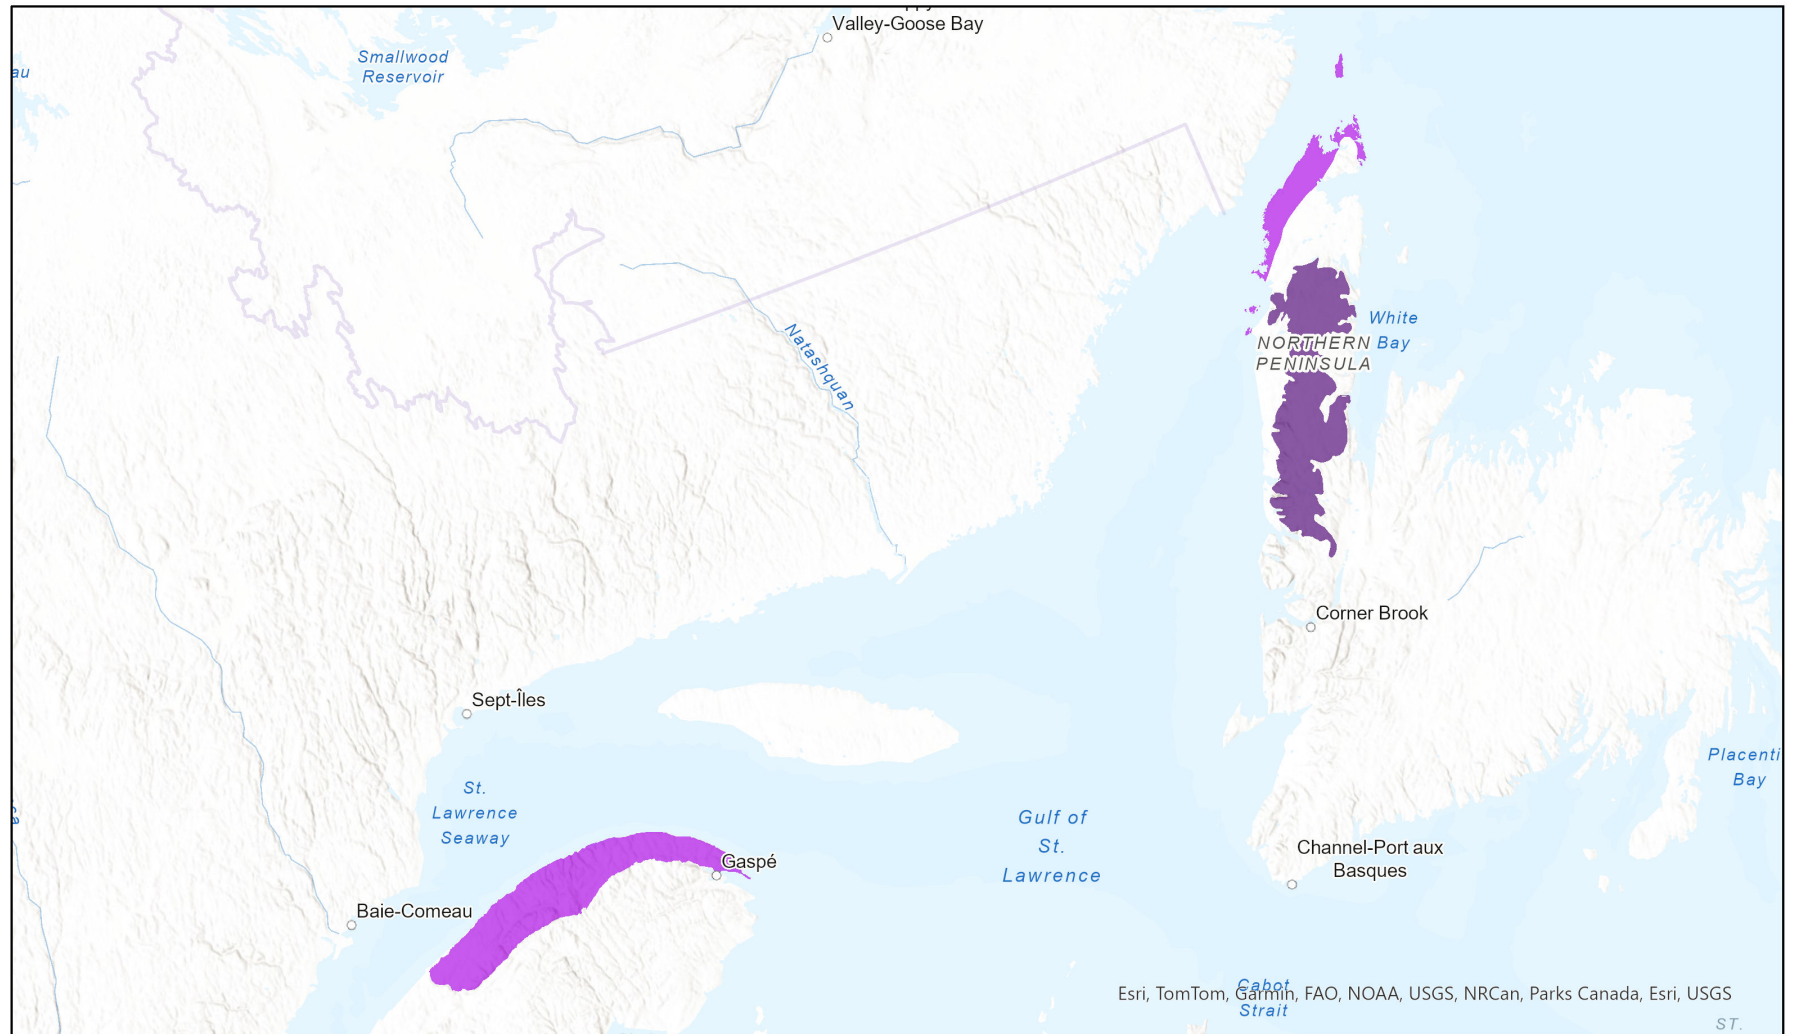

- Present
- Presence Expected
- Historical

## Ecosystem-based Automated Range (EBAR)

Date Generated: April 1, 2025; Version: 1.0; Stage: Expert Reviewed; Scope: Global

Synonyms Used: None

Input Records - 149 ACCDC Observations, 6 GBIF, 5 QC Element Occurrences; Expert Reviews - Claudia Hanel, Paul Sokoloff, 1 Anonymous

Map centre: 61.5047°W 50.4407°N

EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

## Ecosystem-based Automated Range (EBAR) Metadata

---

### Species

National Scientific Name:	<i>Arnica griseomii</i> ssp. <i>griseomii</i>
Scientific Name Reference:	Flora of North America Editorial Committee (FNA). 2006c. Flora of North America north of Mexico. Vol. 21. Magnoliophyta: Asteridae, part 8: Asteraceae, part 3. Oxford Univ. Press, New York. xxii + 616 pp.
National English Name:	Griscom's Arnica
National French Name:	Arnica de Griscom
Element National ID:	211007
Element Global ID:	156380 ( <a href="#">go to NatureServe Explorer</a> )
Element Code:	PDAST0Q0V2
Endemism Type:	Y
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	1271

## Rank/Status

Global Rank:	G5T1T2 (reviewed July 15, 2015)
National Rank (Canada):	N1N2 (reviewed 2015)
Subnational Ranks (Canada):	NF=S1S2, QC=S1
National Rank (United States):	None
Subnational Ranks (United States):	None
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	Threatened/Menacée (February 25, 2019)
Canadian COSEWIC Status:	Threatened (November 28, 2014)
US ESA Status:	None

## Range Map

Date Generated:	April 01, 2025
Version:	1.0
Stage:	Expert Reviewed
Scope:	Global
Metadata:	Primary Species - <i>Arnica grisonii</i> ssp. <i>grisonii</i> Input Records - 149 ACCDC Observations, 6 GBIF, 5 QC Element Occurrences; Expert Reviews - Claudia Hanel, Paul Sokoloff, 1 Anonymous
Comments:	None <a href="#">Please see spatial data for Ecoshape-level reviewer comments.</a>
Disclaimer:	Please review our <a href="#">methods document</a> before using EBAR.  EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis.  The absence of data in any geographic areas does not necessarily mean that a species is not present.  An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	(Please see Comments above for any exceptions)  Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion.  Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model.  Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?), or expert opinion that the species is extirpated or historical.
Usage Type Definitions:	(Please see Comments above for any exceptions)  Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion.  Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
