## Ecosystem-based Automated Range (EBAR) Metadata

---

### Species

National Scientific Name:	<i>Sanicula bipinnatifida</i> Dougl. ex Hook.
Scientific Name Reference:	Kartesz, J.T. 1994. A synonymized checklist of the vascular flora of the United States, Canada, and Greenland. 2nd edition. 2 vols. Timber Press, Portland, OR.
National English Name:	Purple Sanicle
National French Name:	Sanicle bipinnatifide
Element National ID:	214385
Element Global ID:	157023 ( <a href="#">go to NatureServe Explorer</a> )
Element Code:	PDAP11Z040
Endemism Type:	N
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	677

## Rank/Status

Global Rank:	G5 (reviewed January 16, 1990)
National Rank (Canada):	N2 (reviewed 2021)
Subnational Ranks (Canada):	BC=S2
National Rank (United States):	NNR
Subnational Ranks (United States):	CA=SNR, OR=SNR, WA=SNR
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	Threatened/Menacée (June 05, 2003)
Canadian COSEWIC Status:	Threatened (May 01, 2001)
US ESA Status:	None

## Range Map

Date Generated:	February 02, 2022
Version:	1.0
Stage:	Expert Reviewed (National)
Scope:	Canadian
Metadata:	Primary Species Name - <i>Sanicula bipinnatifida</i> Dougl. ex Hook. Input Records - 22 BC Non-sensitive Element Occurrences, 24 BC Vascular Plant Observations, 6 BISON, 126 GBIF, 1 iDigBio, 106 iNaturalist.ca, 92 iNaturalist.org; Expert Reviews - James Miskelly
Comments:	None <a href="#">Please see spatial data for Ecoshape-level reviewer comments.</a>
Disclaimer:	Please review our <a href="#">methods document</a> before using EBAR.  EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis.  The absence of data in any geographic areas does not necessarily mean that a species is not present.  An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	(Please see Comments above for any exceptions)  Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion.  Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model.  Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).
Usage Type Definitions:	(Please see Comments above for any exceptions)  Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion.  Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
