

# Aphyllon pinorum

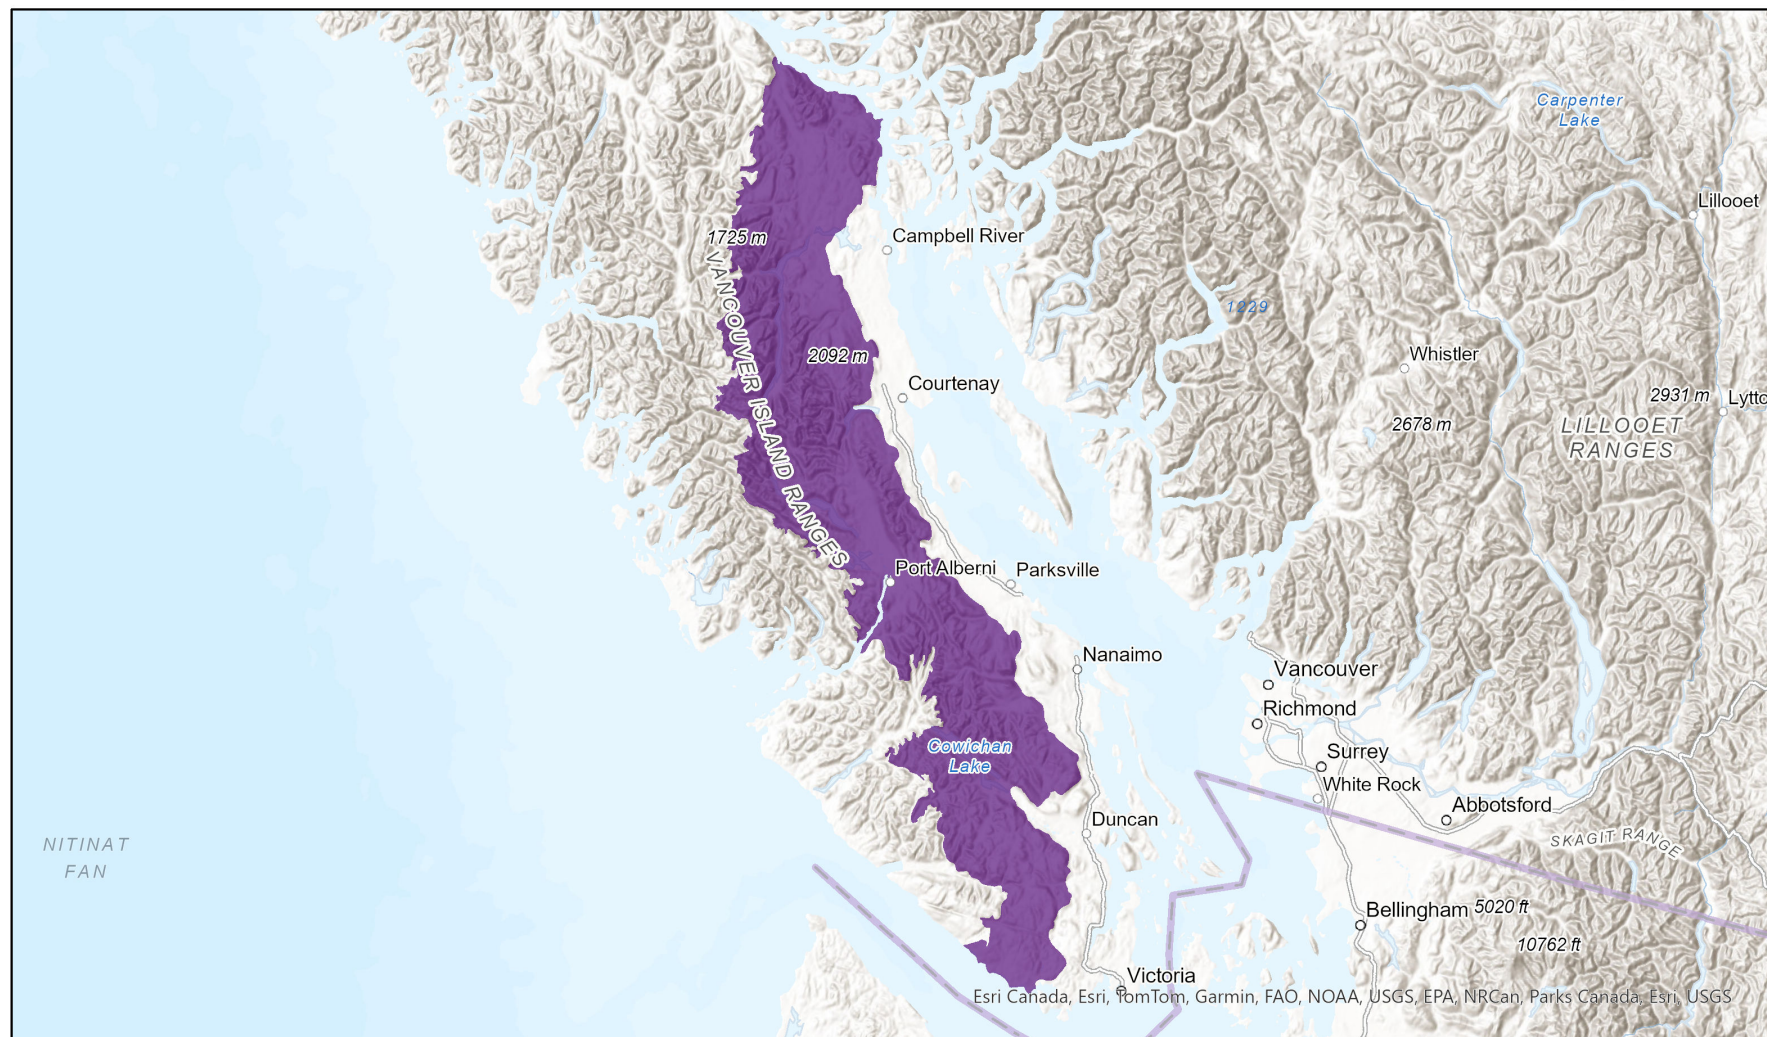

- Present
- Presence Expected
- Historical

## Ecosystem-based Automated Range (EBAR)

Date Generated: February 5, 2025; Version: 1.0; Stage: Expert Reviewed (National); Scope: Canadian

Synonyms Used: None

0 40 80 km

Input Records - 2 BC Non-sensitive Element Occurrences, 1 BC Vascular Plant Observations, 2 GBIF, 14 iNaturalist.ca, 2 iNaturalist.org; Expert Reviews - BC Experts

Map centre: 124.8502°W 49.3754°N

EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

## Ecosystem-based Automated Range (EBAR) Metadata

---

### Species

National Scientific Name:	<i>Aphyllon pinorum</i> (Geyer ex Hooker) A. Gray
Scientific Name Reference:	Schneider, A.C. 2016. Resurrection of the genus <i>Aphyllon</i> for New World broomrapes ( <i>Orobanche</i> s.l., Orobanchaceae). PhytoKeys 75: 107-118. <a href="https://doi.org/10.3897/phytokeys.75.10473">https://doi.org/10.3897/phytokeys.75.10473</a>
National English Name:	Pine Broomrape
National French Name:	Orobanche des pins
Element National ID:	196975
Element Global ID:	158774 ( <a href="#">go to NatureServe Explorer</a> )
Element Code:	PDOR0040B0
Endemism Type:	N
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	3021

## Rank/Status

Global Rank:	G4 (reviewed February 05, 2024)
National Rank (Canada):	N1N2 (reviewed 2022)
Subnational Ranks (Canada):	BC=S1S2
National Rank (United States):	N4 (reviewed 2024)
Subnational Ranks (United States):	CA=SNR, ID=S2, NM=SNR, NV=S1, OR=S4, WA=S3
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	None
Canadian COSEWIC Status:	Endangered (May 06, 2024)
US ESA Status:	None

## Range Map

Date Generated:	February 05, 2025
Version:	1.0
Stage:	Expert Reviewed (National)
Scope:	Canadian
Metadata:	Primary Species - <i>Aphyllon pinorum</i> (Geyer ex Hooker) A. Gray Input Records - 2 BC Non-sensitive Element Occurrences, 1 BC Vascular Plant Observations, 2 GBIF, 14 iNaturalist.ca, 2 iNaturalist.org; Expert Reviews - BC Experts
Comments:	None <a href="#">Please see spatial data for Ecoshape-level reviewer comments.</a>
Disclaimer:	Please review our <a href="#">methods document</a> before using EBAR.  EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis.  The absence of data in any geographic areas does not necessarily mean that a species is not present.  An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	(Please see Comments above for any exceptions)  Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion.  Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model.  Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?), or expert opinion that the species is extirpated or historical.
Usage Type Definitions:	(Please see Comments above for any exceptions)  Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion.  Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
