

# *Fuscopannaria coralloidea*

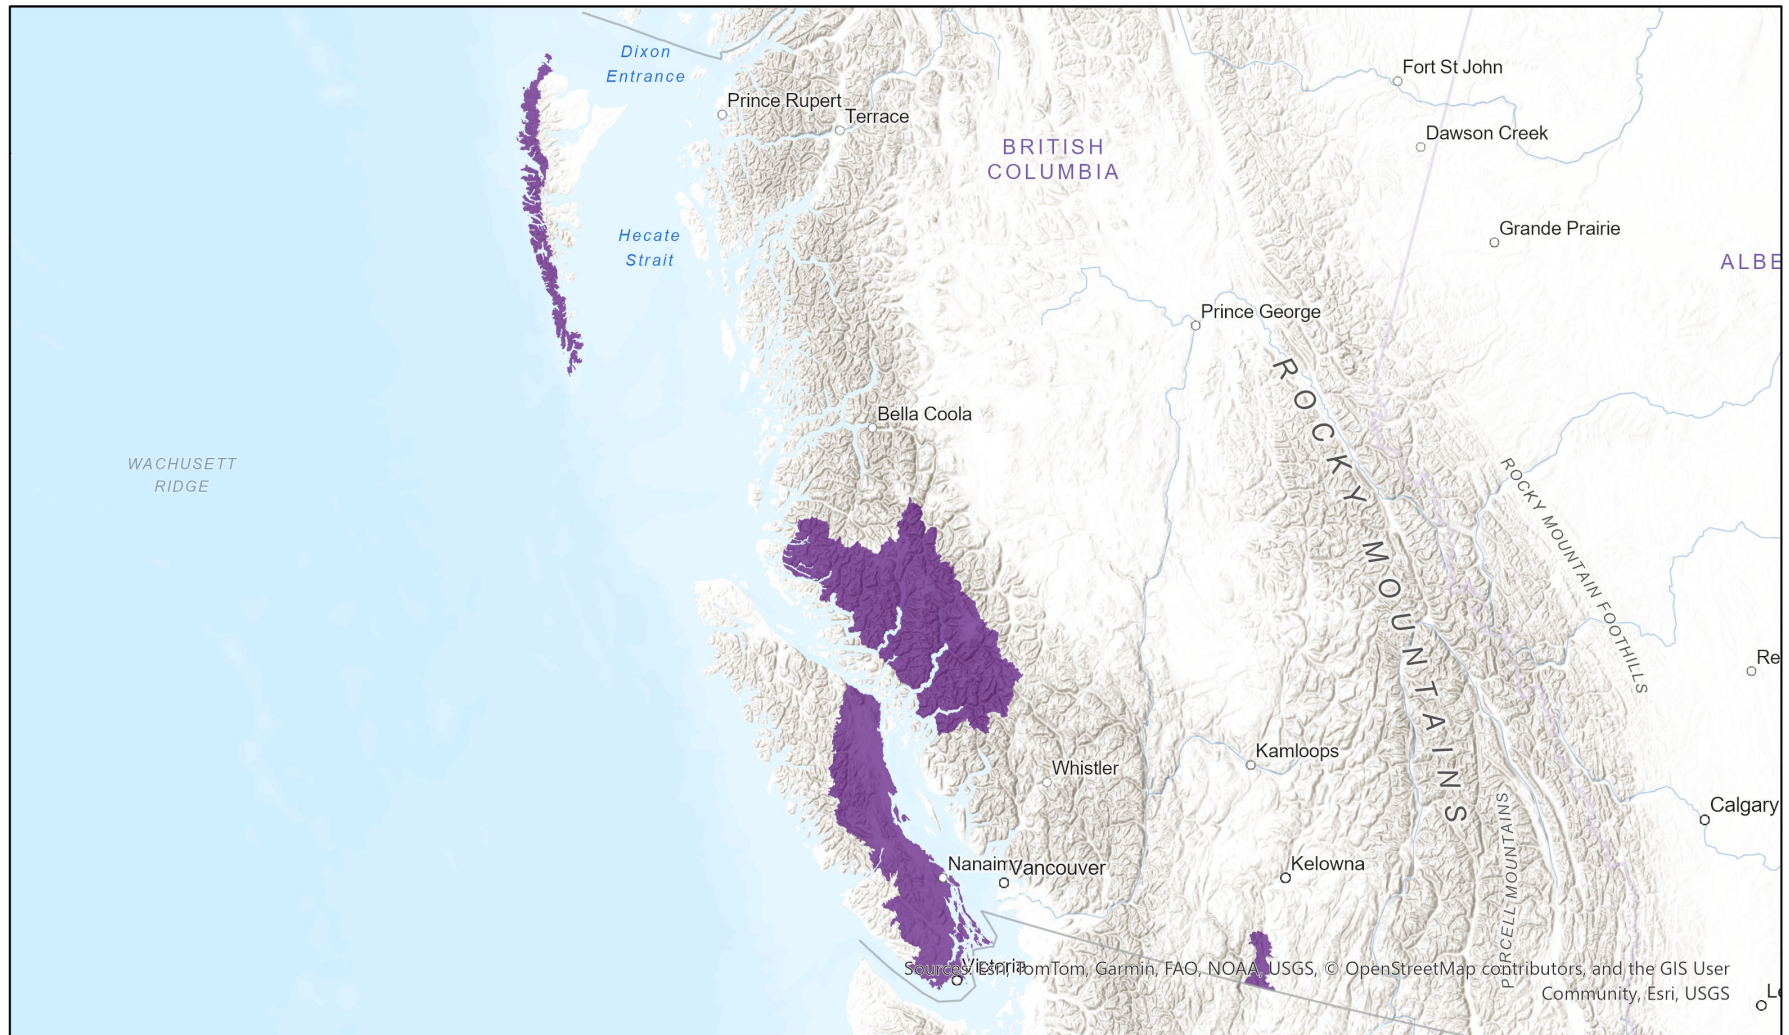

## Ecosystem-based Automated Range (EBAR)

Date Generated: January 22, 2026; Version: 1.0; Stage: Expert Reviewed (National); Scope: Canadian

Synonyms Used: None

- Present
- Presence Expected
- Historical

0 140 280 km

Input Records - 1 BC Non-sensitive Element Occurrences (2015), 4 BC Survey Observations (2015-2018), 4 GBIF (1980-2009); Expert Reviews - BC Experts

Map centre: 126.022° W 51.7198° N

EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

## Ecosystem-based Automated Range (EBAR) Metadata

---

### Species

National Scientific Name:	<i>Fuscopannaria coralloidea</i> P. M. Jørg.
Scientific Name Reference:	Esslinger, T. L. 2018. A cumulative checklist for the lichen-forming, lichenicolous and allied fungi of the continental United States and Canada, Version 22. <i>Opuscula Philolichenum</i> 17:6-268. [ <a href="http://sweetgum.nybg.org/philolichenum/">http://sweetgum.nybg.org/philolichenum/</a> ]
National English Name:	Coral Shingles Lichen
National French Name:	Fuscopannaire corail; Pannaire corail
Element National ID:	835089
Element Global ID:	636959 ( <a href="#">go to NatureServe Explorer</a> )
Element Code:	NLT0033340
Endemism Type:	N
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	
English COSEWIC Common Name:	
French COSEWIC Common Name:	

## Rank/Status

<b>Global Rank:</b>	G2G4 (reviewed November 15, 2002)
<b>National Rank (Canada):</b>	N3 (reviewed 2023)
<b>Subnational Ranks (Canada):</b>	BC=S3
<b>National Rank (United States):</b>	NNR
<b>Subnational Ranks (United States):</b>	WA=S1
<b>National Rank (Mexico):</b>	None
<b>Subnational Ranks (Mexico):</b>	None
<b>Canadian SARA Status:</b>	None
<b>Canadian COSEWIC Status:</b>	None
<b>US ESA Status:</b>	None

## Range Map

<b>Date Generated:</b>	January 22, 2026
<b>Version:</b>	1.0
<b>Stage:</b>	Expert Reviewed (National)
<b>Scope:</b>	Canadian
<b>Metadata:</b>	Primary Species - <i>Fuscopannaria coralloidea</i> P. M. Jørg. Input Records - 1 BC Non-sensitive Element Occurrences (2015), 4 BC Survey Observations (2015-2018), 4 GBIF (1980-2009); Expert Reviews - BC Experts
<b>Comments:</b>	None <a href="#">Please see spatial data for Ecoshape-level reviewer comments.</a>
<b>Disclaimer:</b>	Please review our <a href="#">methods document</a> before using EBAR.  EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis.  The absence of data in any geographic areas does not necessarily mean that a species is not present.  An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
<b>Presence Definitions:</b>	(Please see Comments above for any exceptions)  Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion.  Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model.  Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?), or expert opinion that the species is extirpated or historical.
<b>Usage Type Definitions:</b>	(Please see Comments above for any exceptions)  Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion.  Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
<b>Map Projection:</b>	North America Albers Equal Area Conic (WKID 4269)
