EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

Ecosystem-based Automated Range (EBAR) Metadata

Species

National Scientific Name:	<i>Lithobates pipiens pop. 2</i>
Scientific Name Reference:	Committee on the Status of Endangered Wildlife in Canada (COSEWIC). 2009a. COSEWIC Assessment Results, April 2009. Online. http://www.cosewic.ca/index.php/en-ca/assessment-process .
National English Name:	Northern Leopard Frog - Western Boreal/Prairie populations
National French Name:	
Element National ID:	777481
Element Global ID:	777405 (go to NatureServe Explorer)
Element Code:	AAABH01172
Endemism Type:	N

Rank/Status

Global Rank:	G5TNRQ
National Rank (Canada):	N4 (reviewed 2011)
Subnational Ranks (Canada):	AB=SNR, MB=SNR, NT=SNR, SK=SNR
National Rank (United States):	None
Subnational Ranks (United States):	None
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	Special Concern/Préoccupante (January 12, 2005)
Canadian COSEWIC Status:	Special Concern (April 26, 2009)
US ESA Status:	None

Range Map

Date Generated:	April 08, 2022
Version:	1.0
Stage:	Expert Reviewed
Scope:	Global
Metadata:	Primary Species Name - <i>Lithobates pipiens pop. 2</i> ; Synonyms - <i>Lithobates pipiens</i> (Schreber, 1782), <i>Rana pipiens</i> Schreber, 1782 Input Records - 1271 BISON, 1479 GBIF, 1056 iDigBio, 634 iNaturalist.ca, 248 MB Element Occurrences, 3 MB Source Feature Lines, 766 MB Source Feature Points, 149 MB Source Feature Polygons, 1 MT Ranges, 11 NT Element Occurrences, 1 NT Source Feature Polygons, 576 SK Element Occurrences, 1625 SK Source Feature Points, 1316 SK Source Feature Polygons, 778 VertNet; Expert Reviews - Lea Randall
Comments:	Range spatially constrained both to Alberta, Saskatchewan, Manitoba, and Northwest Territories and using a custom polygon to capture the COSEWIC population extent in Manitoba. Custom polygon based on the 2009 COSEWIC Assessment and Update Status Report: https://wildlife-species.canada.ca/species-risk-registry/virtual_sara/files/cosewic/sr_northern_leopard_frog_0809i_e.pdf Please see spatial data for reviewer comments.
Disclaimer:	Please review our methods document before using EBAR. EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis. The absence of data in any geographic areas does not necessarily mean that a species is not present. An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion. Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model. Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
