EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

Input Records - 6 eBird, 6 iNaturalist.ca, 1 iNaturalist.ca (original coordinates for obscured records); Expert Reviews -

Ecosystem-based Automated Range (EBAR) Metadata

Species

National Scientific Name:	<i>Icteria virens pop. 1</i>
Scientific Name Reference:	Committee on the Status of Endangered Wildlife in Canada (COSEWIC). 2011. COSEWIC Assessment Results. November 2011.
National English Name:	Yellow-breasted Chat auricollis subspecies (Southern Mountain population)
National French Name:	Paruline polyglotte de la sous-espèce auricollis (Population des montagnes du Sud)
Element National ID:	777463
Element Global ID:	777442 (go to NatureServe Explorer)
Element Code:	ABPBX24013
Endemism Type:	N
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	42
English COSEWIC Common Name:	Yellow-breasted Chat auricollis subspecies (Southern Mountain population)
French COSEWIC Common Name:	Paruline polyglotte de la sous-espèce auricollis (Population des montagnes du Sud)

Rank/Status

Global Rank:	G5TNRQ
National Rank (Canada):	N1N2B (reviewed 2012)
Subnational Ranks (Canada):	BC=SNR
National Rank (United States):	None
Subnational Ranks (United States):	None
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	Endangered/En voie de disparition (June 05, 2003)
Canadian COSEWIC Status:	Endangered
US ESA Status:	None

Range Map

Date Generated:	October 13, 2024
Version:	1.0
Stage:	Auto-generated
Scope:	Canadian
Metadata:	Primary Species - <i>Icteria virens pop. 1</i> ; Secondary Species - <i>Icteria virens auricollis</i> (Deppe, 1830) Input Records - 6 eBird, 6 iNaturalist.ca, 1 iNaturalist.ca (original coordinates for obscured records); Expert Reviews -
Comments:	Range map spatially constrained to BC.
Disclaimer:	Please review our methods document before using EBAR. EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis. The absence of data in any geographic areas does not necessarily mean that a species is not present. An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	(Please see Comments above for any exceptions) Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion. Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model. Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?), or expert opinion that the species is extirpated or historical.
Usage Type Definitions:	(Please see Comments above for any exceptions) Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion. Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
