EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

Input Records - 5 BC Incidental Observations, 61 BC Non-sensitive Element Occurrences; Expert Reviews - Ian Adams, 1 Anonymous

Ecosystem-based Automated Range (EBAR) Metadata

Species

National Scientific Name:	<i>Chrysemys picta pop. 1</i>
Scientific Name Reference:	Committee on the Status of Endangered Wildlife in Canada (COSEWIC). 2016a. COSEWIC Assessment Results, November 2016. Committee on the Status of Endangered Wildlife in Canada.
National English Name:	Western Painted Turtle - Pacific Coast population
National French Name:	Tortue peinte de l'Ouest - Population de la côte du Pacifique
Element National ID:	793123
Element Global ID:	793122 (go to NatureServe Explorer)
Element Code:	ARAAD01015
Endemism Type:	N
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	902

Rank/Status

Global Rank:	G5T2Q (reviewed December 03, 2007)
National Rank (Canada):	N1N2 (reviewed 2019)
Subnational Ranks (Canada):	BC=S1S2
National Rank (United States):	None
Subnational Ranks (United States):	None
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	Threatened/Menacée (December 13, 2007)
Canadian COSEWIC Status:	Threatened (November 27, 2016)
US ESA Status:	None

Range Map

Date Generated:	February 23, 2022
Version:	1.0
Stage:	Expert Reviewed
Scope:	Global
Metadata:	Primary Species Name - <i>Chrysemys picta pop. 1</i> Input Records - 5 BC Incidental Observations, 61 BC Non-sensitive Element Occurrences; Expert Reviews - Ian Adams, 1 Anonymous
Comments:	None Please see spatial data for Ecoshape-level reviewer comments.
Disclaimer:	Please review our methods document before using EBAR. EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis. The absence of data in any geographic areas does not necessarily mean that a species is not present. An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	(Please see Comments above for any exceptions) Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion. Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model. Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).
Usage Type Definitions:	(Please see Comments above for any exceptions) Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion. Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
