EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

Ecosystem-based Automated Range (EBAR) Metadata

Species

National Scientific Name:	<i>Sorex rohweri</i> Rausch, Feagin and Rausch, 2007
Scientific Name Reference:	Rausch, R. L., J. E. Feagin, and V. R. Rausch. 2007. <i>Sorex rohweri</i> sp. nov. (Mammalia, Soricidae) from northwestern North America. <i>Mammalian Biology</i> 72:93-105.
National English Name:	Olympic Shrew
National French Name:	Musaraigne de Rohwer
Element National ID:	802030
Element Global ID:	802023 (go to NatureServe Explorer)
Element Code:	AMABA01400
Endemism Type:	N
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	

Rank/Status

Global Rank:	G4G5 (reviewed May 30, 2007)
National Rank (Canada):	N2? (reviewed 2017)
Subnational Ranks (Canada):	BC=S2?
National Rank (United States):	N4N5 (reviewed 2007)
Subnational Ranks (United States):	WA=SNR
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	None
Canadian COSEWIC Status:	None
US ESA Status:	None

Range Map

Date Generated:	November 01, 2022
Version:	1.0
Stage:	Expert Reviewed (National)
Scope:	Canadian
Metadata:	Primary Species - <i>Sorex rohweri</i> Rausch, Feagin and Rausch, 2007 Input Records - 8 BC Non-sensitive Element Occurrences, 5 BISON, 5 GBIF, 2 iDigBio, 11 Royal British Columbia Museum; Expert Reviews - 1 Anonymous
Comments:	
Disclaimer:	Please review our methods document before using EBAR. EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis. The absence of data in any geographic areas does not necessarily mean that a species is not present. An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	(Please see Comments above for any exceptions) Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion. Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model. Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).
Usage Type Definitions:	(Please see Comments above for any exceptions) Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion. Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion. Migration - the species is thought to migrate within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion.
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
