Ecosystem-based Automated Range (EBAR) Metadata

Species

National Scientific Name:	<i>Pseudacris triseriata</i> pop. 1
Scientific Name Reference:	Committee on the Status of Endangered Wildlife in Canada (COSEWIC). 2008. COSEWIC Assessment Results, April 2008. Online. Available: http://www.cosewic.ca/index.php/en-ca/assessment-process .
National English Name:	Western Chorus Frog (Great Lakes / St. Lawrence - Canadian Shield population)
National French Name:	Rainette faux-grillon de l'Ouest (Population des Grands Lacs / Saint-Laurent et du Bouclier canadien)
Element National ID:	816372
Element Global ID:	816371 (go to NatureServe Explorer)
Element Code:	AAABC05151
Endemism Type:	N
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	1019
English COSEWIC Common Name:	Western Chorus Frog (Great Lakes / St. Lawrence - Canadian Shield population)
French COSEWIC Common Name:	Rainette faux-grillon de l'Ouest (Population des Grands Lacs / Saint-Laurent et du Bouclier canadien)

Rank/Status

Global Rank:	G5TNRQ
National Rank (Canada):	N4 (reviewed 2013)
Subnational Ranks (Canada):	ON=S4, QC=S2
National Rank (United States):	None
Subnational Ranks (United States):	None
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	Threatened/Menacée (February 23, 2010)
Canadian COSEWIC Status:	Threatened
US ESA Status:	None

Range Map

Date Generated:	October 29, 2025
Version:	1.0
Stage:	Expert Reviewed (Partially Reviewed)
Scope:	Global
Metadata:	Primary Species - <i>Pseudacris triseriata</i> pop. 1 ; Secondary Species - <i>Pseudacris triseriata</i> (Wied-Neuwied, 1838); Synonyms - <i>Pseudacris triseriata</i> Input Records - 270 ECCC Critical Habitat (2024), 475 GBIF (1917-2025), 38 iDigBio (1957-2008), 36 iNaturalist.ca (2019-2025), 2 iNaturalist.ca (original coordinates for obscured records) (2023-2024), 40 iNaturalist.org (2009-2022), 17152 ON Observations and Source Features (1947-2024), 237 QC Element Occurrences (1954-2024), 10 QC Ranges of Vertebrates, 344 VertNet (1917-2008); Expert Reviews - 2 Anonymous
Comments:	This range has been partially reviewed.
Disclaimer:	Please review our methods document before using EBAR. EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis. The absence of data in any geographic areas does not necessarily mean that a species is not present. An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	(Please see Comments above for any exceptions) Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion. Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model. Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?), or expert opinion that the species is extirpated or historical.
Usage Type Definitions:	(Please see Comments above for any exceptions) Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion. Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
