EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

## Ecosystem-based Automated Range (EBAR) Metadata

---

### Species

National Scientific Name:	<i>Campsomeris pilipes</i> (Saussure, 1858)
Scientific Name Reference:	Poole, R. W., and P. Gentili (eds.). 1996. <i>Nomina Insecta Nearctica: a checklist of the insects of North America. Volume 2 (Hymenoptera, Mecoptera, Megaloptera, Neuroptera, Raphidioptera, Trichoptera)</i> . Entomological Information Services, Rockville, MD.
National English Name:	Yellow Scarab Hunter Wasp
National French Name:	Scolie dorée
Element National ID:	870089
Element Global ID:	869425 ( <a href="#">go to NatureServe Explorer</a> )
Element Code:	IIHYMBB010
Endemism Type:	N
Canadian COSEWIC Name:	<i>Dielis pilipes</i>
Canadian COSEWIC ID:	1446

## Rank/Status

Global Rank:	GNR
National Rank (Canada):	NNR
Subnational Ranks (Canada):	BC=S1S2
National Rank (United States):	NNR
Subnational Ranks (United States):	ID=SNR
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	Special Concern/Préoccupante (February 03, 2023)
Canadian COSEWIC Status:	Special Concern (November 01, 2018)
US ESA Status:	None

## Range Map

<b>Date Generated:</b>	August 30, 2023
<b>Version:</b>	1.0
<b>Stage:</b>	Expert Reviewed (National)
<b>Scope:</b>	Canadian
<b>Metadata:</b>	Primary Species - <i>Campsomeris pilipes</i> (Saussure, 1858); Synonyms - <i>Dielis pilipes</i> (Saussure, 1858) Input Records - 1 Avis, pers. comm., 23 iNaturalist.ca, 19 iNaturalist.org; Expert Reviews - Joel Gibson
<b>Comments:</b>	None <a href="#">Please see spatial data for Ecoshape-level reviewer comments.</a>
<b>Disclaimer:</b>	Please review our <a href="#">methods document</a> before using EBAR.  EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis.  The absence of data in any geographic areas does not necessarily mean that a species is not present.  An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
<b>Presence Definitions:</b>	(Please see Comments above for any exceptions)  Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion.  Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model.  Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).
<b>Usage Type Definitions:</b>	(Please see Comments above for any exceptions)  Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion.  Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
<b>Map Projection:</b>	North America Albers Equal Area Conic (WKID 4269)
