

Salix calcicola var. *glandulosior*

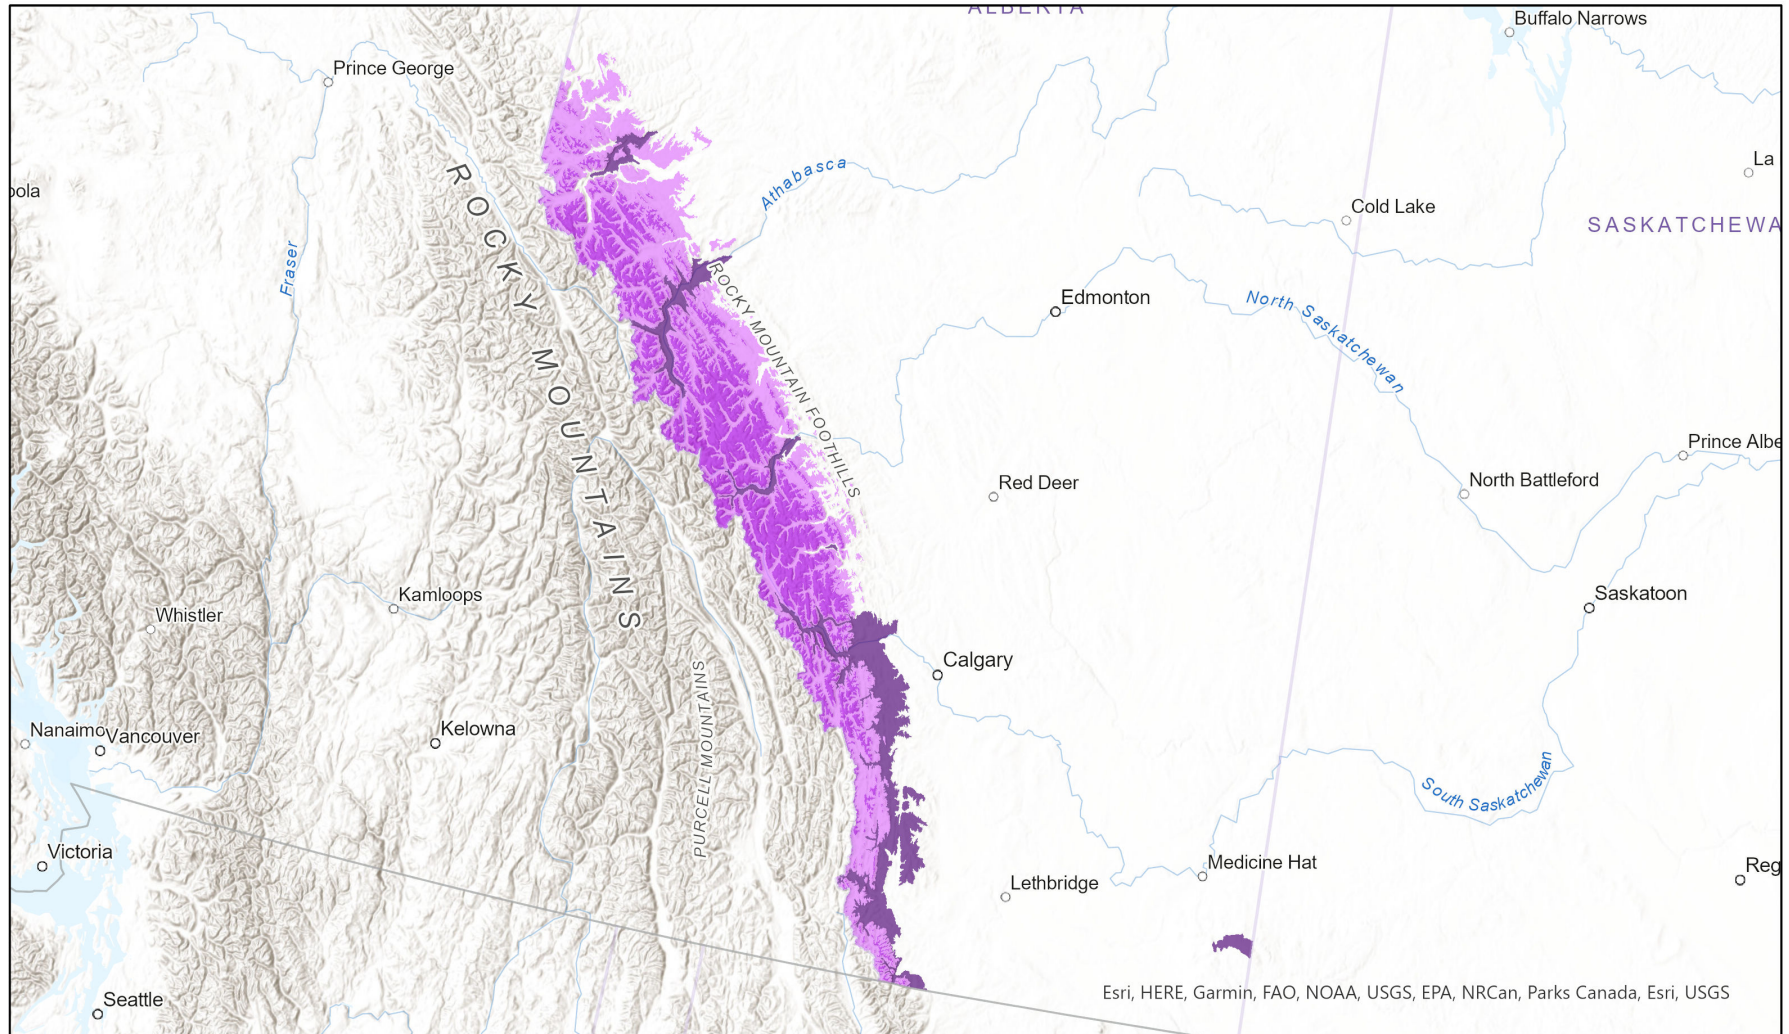

- Present
- Presence Expected
- Historical

Ecosystem-based Automated Range (EBAR)

Date Generated: January 16, 2023; Version: 1.0; Stage: Expert Reviewed (National); Scope: Canadian

Synonyms Used: None

Input Records - 9 AB Element Occurrences, 10 AB Source Feature Polygons; Expert Reviews - Varina Crisfield

Map centre: 114.89° W 51.9832° N

EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

Ecosystem-based Automated Range (EBAR) Metadata

Species

National Scientific Name:	<i>Salix calcicola</i> var. <i>glandulosior</i> B. Boivin
Scientific Name Reference:	Flora of North America Editorial Committee. 2010. Flora of North America North of Mexico. Vol. 7. Magnoliophyta: Salicaceae to Brassicaceae. Oxford University Press, New York. xxii + 797 pp.
National English Name:	Glandular Limestone Willow
National French Name:	Saule glanduleux
Element National ID:	870150
Element Global ID:	870149 (go to NatureServe Explorer)
Element Code:	PDSAL021L4
Endemism Type:	N
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	

Rank/Status

Global Rank:	G4G5T1T2 (reviewed June 23, 2016)
National Rank (Canada):	N2 (reviewed 2018)
Subnational Ranks (Canada):	AB=S2
National Rank (United States):	NNR
Subnational Ranks (United States):	CO=SNR
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	None
Canadian COSEWIC Status:	None
US ESA Status:	None

Range Map

Date Generated:	January 16, 2023
Version:	1.0
Stage:	Expert Reviewed (National)
Scope:	Canadian
Metadata:	Primary Species - <i>Salix calcicola</i> var. <i>glandulosior</i> B. Boivin Input Records - 9 AB Element Occurrences, 10 AB Source Feature Polygons; Expert Reviews - Varina Crisfield
Comments:	
Disclaimer:	Please review our methods document before using EBAR. EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis. The absence of data in any geographic areas does not necessarily mean that a species is not present. An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	(Please see Comments above for any exceptions) Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion. Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model. Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?).
Usage Type Definitions:	(Please see Comments above for any exceptions) Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion. Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion. Migration - the species is thought to migrate within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion.
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
