 EBAR is relatively coarse scale data and not intended for all applications and analysis. Please see full disclaimer in metadata.

Input Records - 2 ACCDC Observations (1960-2013), 1152 Birds Canada Nature Counts (1877-2024), 3977 eBird (1904-2022), 6 GBIF (1931-2023), 5 iNaturalist.ca (2024), 181 iNaturalist.ca (original coordinates for obscured records) (1977-2025), 70 ON Breeding Bird Atlas (2001), 141 ON Element Occurrences (1906-2009), 7499 ON Observations and Source Features (1906-2024), 3 QC Breeding Bird Atlas (2010), 52 QC Element Occurrences (1951-2019); Expert Reviews -

Ecosystem-based Automated Range (EBAR) Metadata

Species

National Scientific Name:	<i>Lanius ludovicianus pop. 1</i>
Scientific Name Reference:	Committee on the Status of Endangered Wildlife in Canada (COSEWIC). 2014a. Database of wildlife species assessed by COSEWIC. Last updated June 9, 2014. Online: http://www.cosewic.ca/index.php/en-ca/assessment-process
National English Name:	Loggerhead Shrike Eastern subspecies
National French Name:	Pie-grièche migratrice de la sous-espèce de l'Est
Element National ID:	916910
Element Global ID:	916907 (go to NatureServe Explorer)
Element Code:	ABPBR01038
Endemism Type:	N
Canadian COSEWIC Name:	
Canadian COSEWIC ID:	1265
English COSEWIC Common Name:	Loggerhead Shrike Eastern subspecies
French COSEWIC Common Name:	Pie-grièche migratrice de la sous-espèce de l'Est

Rank/Status

Global Rank:	G4TNRQ
National Rank (Canada):	NNR
Subnational Ranks (Canada):	NB=SXB, NS=SXB, ON=SNR, QC=S1B
National Rank (United States):	None
Subnational Ranks (United States):	None
National Rank (Mexico):	None
Subnational Ranks (Mexico):	None
Canadian SARA Status:	Endangered/En voie de disparition (June 05, 2003)
Canadian COSEWIC Status:	Endangered
US ESA Status:	None

Range Map

Date Generated:	November 07, 2025
Version:	1.0
Stage:	Auto-generated
Scope:	Canadian
Metadata:	Primary Species - <i>Lanius ludovicianus</i> pop. 1 ; Secondary Species - <i>Lanius ludovicianus</i> Linnaeus, 1766 Input Records - 2 ACCDC Observations (1960-2013), 1152 Birds Canada Nature Counts (1877-2024), 3977 eBird (1904-2022), 6 GBIF (1931-2023), 5 iNaturalist.ca (2024), 181 iNaturalist.ca (original coordinates for obscured records) (1977-2025), 70 ON Breeding Bird Atlas (2001), 141 ON Element Occurrences (1906-2009), 7499 ON Observations and Source Features (1906-2024), 3 QC Breeding Bird Atlas (2010), 52 QC Element Occurrences (1951-2019); Expert Reviews -
Comments:	None
Disclaimer:	Please review our methods document before using EBAR. EBAR range data are relatively coarse scale and appropriate for screening and education purposes, but are not intended for all types of applications and analysis. The absence of data in any geographic areas does not necessarily mean that a species is not present. An ecoshape with a presence value does not necessarily mean that a species is present throughout the entire geographic area.
Presence Definitions:	(Please see Comments above for any exceptions) Present - the species is found within the ecoshape based on species observation data, Element Occurrences, Source Features, Canadian Federal Critical Habitat, or expert opinion. Presence Expected - expert opinion the species may be present, or the ecoshape overlapped with a range estimate or a habitat suitability model. Historical - all species occurrence data within the ecoshape contains observation data greater than 40 years old or an Element Occurrence (EO) that was ranked as Extirpated or Historical (EO Rank of H, H?, X or X?), or expert opinion that the species is extirpated or historical.
Usage Type Definitions:	(Please see Comments above for any exceptions) Breeding - the species is thought to breed within the ecoshape based on eBird Breeding and Behaviour Codes or expert opinion. Possible Breeding - the species is probably or possibly breeding within the ecoshape based on eBird, BBA or jurisdiction Breeding and Behaviour Codes, or on expert opinion.
Map Projection:	North America Albers Equal Area Conic (WKID 4269)
